1. Welcome!

Yahoo group: CQ100_QsoNet
Date: 2006-10-25 23:00:53 UTC
From: jasinnj2000
Topic: 1 Message: 1

Welcome to this new Group discussing all things related to QsoNet, the new VoIP service created by Douglas, VE3EFC. And of course, the feature rich virtual ham radio interface, CQ100, our portal to the "virtual ionosphere".

Please ask your questions, tell us about your usage of QsoNet, any experimentation, or anything else that comes to mind regarding this great new service.

QsoNet_CQ100 Group Moderator - N2QOJ

Ok and many thanks for the info, 73 from Ant.

5. 29.600 Mhz QsoNet RF Gateway

Yahoo group: CQ100_QsoNet
Date: 2006-10-26 22:45:04 UTC
From: jasinnj2000
Topic: 5 Message: 5

There is an RF gateway on QsoNet at 29.600 Mhz. It is the G3VFP 2 Meter UK Gateway provided by Dave, G3VFP.

You can find a good description of QsoNet and the G3VFP Gateway here at Dave's home page: http://www.g3vfp.org/qsonet.htm

Enjoy!

6. Group Membership, Discussion Topics

Yahoo group: CQ100_QsoNet
Date: 2006-10-27 16:55:03 UTC
From: jasinnj2000
Topic: 6 Message: 6

Well, the Group is growing nicely.

I look forward to member posts regarding QsoNet issues and operating items.

Typical topics on the discussion board that could be explored here:

Operating:

1. delays between transmissions to allow other station check-ins

2. calling frequency usage and QSY techniques

3. VOX, PTT, PTT/PTL modes

Features:

1. What would you like to see incorporated in CQ100 as features?

2. Present features - useful, easy-to-use?

Gateways:

1. How will the true RF gateways affect how you use QsoNet?

2. ARe HF gateways on QsoNet feasible?

Modes:

1. Digital Modes

2. File Transfer techniques

3. Logging of activity - QSO recording?

These are just a few items that I have noted as being typical discussion points. I'm sure you all have more.

Let's start discussing them!

Moderator, N2QOJ

From: Phil Manning
Topic: 2 Message: 9

On CQ100 7.055 is indicated as being in the CW band, here in the UK and
Europe it is SSB.

Phil.

From: Ken - N9VV
Topic: 13 Message: 13

Hi, is it possible to pipe some PSK31 {Olivia, MFSK} tones into the input of CQ100 and work digi modes?

14. Re: any one running PSK31?

Yahoo group: CQ100_QsoNet
Date: 2006-10-27 21:51:47 UTC
From: jasinnj2000
Topic: 13 Message: 14

Yes indeed.

Folks are using SSTV, psk31, and modulated CW with success over CQ100.

MixW and DigiPan programs are in use with QsoNet. The bandwith of the service's audio spectrum seems to be up to the job and packet loss must be very low to nil.

Same as HF, check 14.230 for SSTV activity and 14.070 for psk31.

I know that one of our members here, KD5LWU, Reverend Father Johnny, has been active with SSTV on QsoNet.

Johnny - That is an interesting arrangement.

If you think it may be a port isssue, why not setup that laptop's local ip as a DMZ? That would ensure that everyone this is open for a test case.

I've never run a router to distribute dial-up service so it is new for me.

As for what port(s) CQ100 is using, I think we need input form VE3EFC.

Also can CQ100 run successfully on the main computer?

Thanks ☐ Cable modem from charter to a business location is very expensive so I simply tricked the modem to see dialup then added a proxy server for a faster alternative then ICS. Yes cq100 works with the main computer so I know it☐s a proxy issue. DMZ is a good ideal for trouble shooting though I doubt the router is the issue because of it working on the main. Plus this is an access point for my customers and neighbors at the shop so it will be a very short test. Again thanks and 73

I agree on the router issue since the main computer is ok.
.
DNS Server at the router should be turned. ICS and dial-up doesn't need a DNS server. Should be no different with the proxy method. Something else to check.

** Important Update **

G3VFP has moved his 2 Meter Gateway to 29.610 QsoNet.

29.600 is the "informal" calling frequency for that band.

The QsoNet Frequency Guide in the Files section of this Group will be
updated to reflect those changes.

Hi Joe, and guys

Yes I moved the rf gateway this afternoon because one or two guys thought it was the fm calling freq for fm. Not surprising I guess :-). In any event I moved it to 29.610 to save any confusion.

The rf gateway itself is running on 145.2125 Mhz fm with an 82.5hz ctcss access tone from the rf side, and is not linked to any other voip system. It's location is approximately 60 Km north of the city of Manchester in the NW of England, and appox 10Km Sth of our local small city of Preston. For those familiar with the area it is located right next to junction 9 of the M61 motorway, and junction 29 of the M6 motorway at qra IO83PQ. It has very good coverage of the south, west, and north of the county, and mobiles as well as fixed stations are welcomed. Audio idents announcing the gateway, and it's connection to qsonet are transmitted every fifteen minutes on 2 metres.

Callers from qsonet may not get an rf response all the time as there is no guarantee of anyone being on the 2 metre frequency at that moment, but please put out a reasonable length cq call, or even enter into a qso on qsonet leaving a three to four second break between overs to allow anyone from the rf side to join in.

Many thanks guys.

Best Regards,

Dave G3VFP

He Steve and guys.

Thanks for your thoughts, it is good fun experimenting with systems, and proves there is always something else to play with in our great hobby. I should have added that the gateway is not active 24/7 as it is off between 01:00 and 08:00 UTC, as I'm asleep, and not much activity rf wise during those hours :-). Thanks for calling in Steve it was nice to meet up for a chat.

Cheers

35. QsoNet while Mobile

Yahoo group: CQ100_QsoNet
Date: 2006-10-31 17:46:52 UTC
From: jasinnj2000
Topic: 35 Message: 35

Yesterday, I took my laptop with Sprint Aircard service and went mobile near my home in Arizona.

As expected, no problems working CQ100 QsoNet while roving about.

My first contact was with Peter, GM1CMF, in Scotland and we had a great QSO. On my return trip home, I had my second mobile QSO - again with Peter, but this time his buddy Tom, from the UK (but visiting Scotland), also was in the QSO from his QTH.

It was great fun to operate mobile with QsoNet. Thank you Peter and Tom for the opportunity!

36. CQ100 - Possible new features/functions

Yahoo group: CQ100_QsoNet
Date: 2006-10-31 21:18:16 UTC
From: Stan Weber
Topic: 36 Message: 36

Well, with all of 3 days experience using CQ100 I can honestly say that the developer(s) have done an outstanding job. They have created a very realistic radio interface (simulation) that will only get better.

The hardest urge, IMHO, will be to resist covering the radio face with more and more buttons.

(1) I like the use of what I call "proximity sensitive" features. If I let the cursor "hover" over the audio gain dial--a simple movement of the thumb wheel, or left-click and moving CW or CCW will adjust the dial.

With that in mind, it would be nice to let the cursor "hover" over the spot where our CALLSIGN, LOCATION, NAME appears---and a list would briefly appear that shows the stations that are all presently on QSO. It would also be nice if after, say 5 minutes of inactivity by a specific station, the name of station disappears from that same list.

I find that I currently require a pencil and paper to jot down station callsigns and names when I'm QSO'ing.

(2) When in CW mode--by pressing the mode button to display "KEYER"--it would be nice to have a long rectangular box (the width of the base of the radio) appear and you could see at least 60-70 characters of what you have typed on the keyboard---all if it slowly moving to the left and disappearing as the code generator creates CW. This wouldn't be important for those who choose to use an actual key/bug.

(3) Presently, by clicking on the little white vertical "spikes" representing stations--the dial moves over to that "spike" at a predetermined speed. It would be nice to have it just immediately "jump" directly to that "spike".

(4) Now this is getting fancy, but if you had previously used a setup list of standard DXCC countries (a .txt file)--and you checked the ones you were looking for--then the "spikes" would either become "red"--or they would blink. Now you would have an immediate visual depiction for targeted DX as soon as you jumped onto the specific band.

(5) An auto-logging feature that simply date and time stamps the station you are QSO'ing and writes/appends it to a .txt file or an Excel file.

Well, those are my thoughts this afternoon--so I thought I would toss them out to foster further discussion and ideas.

Enjoying a renewed interest and actual operating time,

Stan

37. the "Files" section

Yahoo group: CQ100_QsoNet
Date: 2006-10-31 22:43:02 UTC
From: jasinnj2000
Topic: 37 Message: 37

Folks,

For especially new members, please be sure to check the "files" section of this Group for some files that you find interesting. Of course, you will need to visit the Group via YAHOO to accomplish that.

There you will find a copy of the CQ100 User Guide, a QsoNet Frequency Guide, and this Group's FAX sheet. I'm sure the catalog will grow in time.

A belated thank you to Ken, N9VV, for suggesting PDF file versions in addition to the WORD formats. Ken is correct - most folks have Acrobat Readers installed, so PDF versions is a great option for all of us.

Regards,

Joe, N2QOJ

Fascinating list and I guess the points have some support. The only item I would raise question with is the DXCC list. Amateur (Ham) radio is a hobby built up of skills usually aquired during years of experience, and in the "real rf" world sending a qsl card is accepted where anyone requires one. There are skills associated with gaining any qualification on rf too, but the use of dxcc on an internet system however great, and worthwhile that system is, requires no skill whatsoever. Why dumb down the hobby any more than it already is. After all the collection of cards for ones own personal enjoyment on voip systems is perfectly fine, but surely couldn't count for any award. Course I can't speak for the ARRL, but I hardly think they had this in mind when they set up the award structure :-) DX on the internet isn't real life, it's Walter Mitty time, let us not get confused guys..."no pain no gain" covers it I guess :-)

Just my thoughts,

Dave G3VFP

These instructions come from a G0DNI post to the QsoNet Discussion boards:

Settings for CwGet:

1. Make sure that you have the CQ100 set to play sounds over your PC soundcard, so you can hear the CW without headphones. Do this by clicking on the question mark at the top left of the CQ100 and select your soundcard from the drop-down menu

2. Tune to the practice code at 14.090

3. Run CwGet (the unregistered version works fine for your test - I've registered now as I use it a lot)

4. Go to CwGet setup and select your soundcard - default will probably work just fine.

5. Can you see the signal waveform in the top half of the CwGet window, if not, bring up the PC volume control properties (double click on the loudspeaker icon at the bottom right of the PC screen by the clock)

6. In the soundcard window, select Options, Properties, Recording and make sure that you have ticks in all the little boxes in the lower half of the window.

7. Click OK

8. Click in the Stereo Mixer box in the recording voume control and you should now get the signal showing in CwGet.

9. Click on the peak of the signal waveform in CwGet and you should see code appearing as text in the bottom window.

10. If the code is incorrect, play with the CQ100 volume control - remember, if you can't hear the code through your PC speakers then it's probably not going to work.

OK, try that and post again if it doesn't work

49. G3VFP RF LINK

Yahoo group: CQ100_QsoNet
Date: 2006-11-04 15:45:31 UTC
From: g3vfp
Topic: 49 Message: 49

Hi guys

only a quick message to say that my two metre rf linking gateway on 29.610 will be interupted from time to time over the weekend as I am carrying out some mods to the system here. If you don't hear the ident message going out on the quarter hour, then it maybe offline.

Thanks for those who are using it, trying to stimulate rf activity can be like plucking hens teeth though :-)

Regards,

Dave G3VFP

Topic: 46 Message: 50

Al, if you mean how can you work a QsoNet frequencey that is linked to a repeater, then just go that frequency and work it as usual.

Try 29.610 which is linked to a 2 meter gateway in the UK.

If you mean how can you setup your QsoNet CQ100 with a link radio to set up your own linked radio or repeater gateway, then it is the same as Echolink except there is no RTS/DTR control via a com port. CQ100 has no computer control PTT interfacing. You must use VOX keying.

Maybe someone in the Group can add to this response or clarify a bit more for you.

Forgot to add:

At 29.610, it is G3VFP's 2 meter gateway which is usually not operational between 01:00 and 08:00 Zulu.

I just see now that Dave, G3VFP, is running some maintenance/mods on his Gateway this weekend. See his post for details.

From: jasinnj2000
Topic: 55 Message: 55

Folks,

If you tell your fellow QsoNet contacts to join this Group, please remind them to mention their call sign with their request-to-join.

I have a couple of requests-to-join that have not given me their call signs and they haven't responded to my THREE direct requests by email.

That's all I need from new folks - just their call sign - so we can keep the GROUP for licensed hams only - just like the service.

Thanks for passing the word,

Joe, N2QOJ - Moderator

56. GROUP Net?

From: jasinnj2000
Topic: 56 Message: 56

Would anyone out there like to host a NET for our members of the QsoNet_CQ100 YAHOO GROUP?

Remember, we have members world-wide so the time would have to be a good compromise for everyone, or, maybe two NETS to address the audience better.

Might be a good idea for exchange of info and ideas in real time using the service that we all have grown to like (love).

Pat,

Do you have regular audio working? If you can't play songs, video audio, or other regular audio items, then the problem has nothing to do with CQ100.

If it is a problem with only CQ100, then make sure your audio settings in volume/recording control properties are correctly set. CQ100 requires no special audio driver.

From: Rich
Topic: 59 Message: 59

Hi,
Just wanted to say hello and thanks for this group.
It is a great addition to the CQ100 forums.
I have been on CQ100 since October 24th and can't believe how
many new members have joined since. It's one of the greatest
radio programs I have ever seen and works fantastic.
I really appreciate the time it took to make such a wonderful
program and give the highest praise to the designers.
I will definitly continue to use it after the trial period.
As a disabled ham operator, I can't always get into the shack
which is a building outside of my house. I have a laptop next to
my bed and that's where I use the CQ100 for the days when I can't
move to well. You have no idea what it means to be able to use the radio
and have a link to the outside world and the hobby I love so much.
This, I am sure has helped many others with disablilities and the
elderly, apartment dwellers as well. You all should be commended for
such an undertaking and know that your work has made a great difference
to so many people. You have my graditude and support.
Thanks,
Rich, W2EBR

I quite agree - Douglas, VE3EFC, has done a tremendous service for hams with special needs or special circumstances.

I read the same sentiment in the QsoNet Forums and I hear many folks say basically the same thing - it is a blessing for those hams are physically challenged or just can't setup and maintain an HF station for other reason.

Not only is QsoNet a very easy-to-use service for us hams but it is the ONLY option for some folks to stay in touch with other hams in the hobby.

I too will continue to use QsoNet.

Thank you for posting your comments,

Joe, N2QOJ - Moderator

64. Installing without system administrator privileges???

Yahoo group: CQ100_QsoNet
Date: 2006-11-24 11:56:03 UTC
From: Alfred Mateja
Topic: 64 Message: 64

Hello,

I need your help, please: QsoNet is running fine here but only when I install it as system administrator. Whenever I try to install it without these privileges it says: "Couldn't get write excess to HKEY_LOCAL_MACHINE\Software\Microsoft\Windows\CurrentVersion\Uninstall\CQ100".

Is there a way to overcome this? The manual says it is possible to install QsoNet for multiple users, not only for the system administrator.

I use Windows XP Home Edition and with administrator privileges I have installed QsoNet to the proposed directory.

Please answer in plain English and thanks in advance

73, Alfred, OE5AKM

68. CQ100 Nets

Yahoo group: CQ100_QsoNet
Date: 2006-11-24 19:09:59 UTC
From: Daryl Stout
Topic: 66 Message: 68

Hi, Joe...

> Mark, KC6UVA, is looking to start a Tech Net for
>
> Joe, N2QOJ - Moderator

I've downloaded CQ100, but haven't put it back on just yet, after I had to do a reformat because of Echolink soundcard issues (digital camera had stolen the record part of it, but that's fixed now). But, I will try to get it sometime next week...the holiday weekend is a bit full.

Anyway, my main ham radio modes right now are VHF Packet and Echolink, due to power and antenna restrictions at the QTH (the XYL and I are both disabled).

This message is the first I've seen about a "net" on QSONet, although I'm a relatively new member to this Yahoo Group. My question is that I've been doing a list of nets for Echolink off of my homepage (www.wx1der.com/elk.htm) since March, and wondered if there was similar interest to my doing something like that for QSONet. If so, it'd probably be similar to that page, but using CQ100 frequencies instead. I'd also have to look at the FAQs again for a bit more info for the proposed page.

Along that line, from the FAQ, as long as one has a valid amateur radio license...even if it's just a U.S. Technician class...they can use the entire area of CQ100...correct me if I'm wrong.

No rush on the reply...I have work with my ham radio/weather telnet BBS this weekend, along with nets to run on *MISSLYNK* and *WX_TALK* Saturday.

69. Trying to get SSTV to work

Yahoo group: CQ100_QsoNet
Date: 2006-11-25 17:10:37 UTC
From: ve3tmt
Topic: 69 Message: 69

Hello all,

I recently installed CQ100 and it is working very well except for my SSTV mode. I use MixW on PSK31 and CW and have no problems in those modes. However on SSTV the pictures are coming out very jagged. The same setup works fine on HF on my TS830. What center frequency should I be using? How do I go about calibrating my sound card? It is an SB Live.

If someone wants to e-mail off board who can step me through the SSTV it would be appreciated.

Thanks,

Max VE3TMT

Topic: 66 Message: 70

Hi Daryl,

Yes, any licensed ham can use QsoNet with no class restrictions.

QsoNet has its own bandplan regarding CW and Voice portions. VE3EFC requests that CW operations (and other digi modes?) stay in the CW portion with voice and CW allowed everywhere else.

Also, a few informal calling frequencies have been become the defacto standard with 14.200 Mhz as the calling frequency for 20 Meter QsoNet.

As for the QsoNet NET and Schedule list, I started one that you can find in the "Files" section of this Group. That should help you start your effort. I try to update that list only when I can get confirmation that these events are really happening.

One thing I have noticed is that some operators use the term "NET" loosely - and incorrectly - in my opinion. A "Net" should be a regularly scheduled meeting with a designated NET operator at a specific time, date, and QsoNet frequency location. A published topic should also be included.

My view of a SKED should be any one-time meeting place agreed upon by two or more operators.

That is my opionion based on nearly 30 years of operating but, who knows, maybe things have changed!

Keep us updated on your progress, regards and a belated Happy Thanksgiving to all our US members,

Joe, N2QOJ - Moderator

71. I need HELP!!! Using MMSSTV with the CQ100

Yahoo group: CQ100_QsoNet
Date: 2006-11-27 08:23:49 UTC
From: Rich
Topic: 71 Message: 71

Hi,
I have the MMSSTV program and am totally new to sstv and how it is used. I would like to know how to interface this with the cq100 so I can receive sstv transmissions and maybe even send something if I get a web cam or want to send a picture. I have always worked the radio just using phone bands and cw so the whole computer with ham radio is all new to me. I do enjoy using the cq100 a great deal. Being disabled, I don't get out to the shack as much as I would like to. It has been a great addition to the modes used on ham radio and has been great medicine for me too!!!
If anyone can explain how to accomplish what I am trying to do in simple terms I would appreciate it a great deal.
Thanks for such a great program(CQ100)and a break through in ham radio/internet communications.
Thanks,
Rich, W2EBR

Hi Rich,

A group of us have been experimenting over the last couple of days using SSTV on 14.230 MHz. Some of us are receiving pictures and some get nothing but a garbled screen. Most of us are using MMSSTV, which can be downloaded for free from: http://mmhamsoft.amateur-radio.ca

Although I understand what you meant, this is not a new mode of amateur radio. It is VOIP with an amateur radio look and feel. I think it is a lot of fun and allows hams with antenna restrictions to communicate with others around the world.

The main problem we are running into I believe is related to bandwidth. I have downloaded SSTV sound files from Mako's website and they decode perfectly. Using the TS830 on 20m they also decode perfectly. But if you watch the signals on CQ100 they are all over the place. The sync signal gets lost, the bandwidth suffers, and audio quality varies from great to very poor. All of these are going to be a factor in the quality of the picture being sent.

But with that said, download the program and watch for some activity on 14.230. It is fun trying to get the SSTV mode working, but I don't hold out much hope.

From: ve3tmt
Topic: 73 Message: 77

There seems to be a lot of interest in operating CW, PSK31, RTTY and SSTV over the CQ100 network. While some modes will be more successful than others, certain steps must be taken to ensure you have the cleanest and clearest signal possible, which is a must for good decoding on the other end.

If you already operate any of these modes over "traditional" HF radio, then you are almost home. The only difference is instead of directing the tones to your HF radio for transmission, they are directed out over the internet.

Most of us on 14.230 are using MMSSTV or MixW for SSTV, but there are a number of others that will work just as well. Paul, N1PA and myself conducted some tests over the network while on the phone and found that signal levels and the quality and speed of the internet connection play a major role in how the picture transfer will turn out.

If you are interested in trying this mode, please read the MMSSTV guide in the files section. It will explain in great detail how to set the program up, and you will be sending and receiving pictures in no time. One thing I must stress as well, read up on your sound card. I do not recommend using a microphone placed in front of your speaker to pick up the tones when sending a picture. Any noise in the room, whether a phone or a cough or a dog barking will be sent along with the picture tones and this will cause the station on the receiving end to lose sync. If the sync tone (1200 Hz) is lost, the picture will start to scramble. You should be able to loop back the tones into your sound card and this will keep the tones internal, and will not be subject to noises in the room. Again, refer to your sound card documentation. Not all cards may be capable of this, but all of the SoundBlaster series are.

The idea here is to have fun. Many of you will give up in frustration and it may turn out to be something minor causing the grief. With help we can have everyone up and running in no time.

80. SSTV Musing's

Yahoo group: CQ100_QsoNet
Date: 2006-12-06 11:07:56 UTC
From: Larry Wright
Topic: 80 Message: 80

Hello Group

Its better to send lower volume undistorted audio at TX end then let the Rxing Station turn his/hers up Assuming its necessary.
The other thing is theres a mode in MIXw that does work called TTT.
Now all we need perhaps Makoto Mori, JE3HHT. the author of MMSSTV to include it in MMSSTV Next is a reliable Timing source I,m talking to the on line net server PC time spot on but sound card timing is another thing, I'm hoping to find a MSF tick generator <Not Holding my Breath>
Regards Larry

It's been a handful Larry. I think part of the problem is a lot of operators using CQ100 have had no prior experience with SSTV over the HF bands. Without having some basic knowledge if how it works it becomes very difficult trying to explain why their picture is not going through. I think more knowledge is required of the sound card setup itself than of what is required in MMSSTV. You DO need to know what the settings on your sound card are and what they do.

Also, I hear many operators trying to send a picture by holding the microphone up to the speaker. You simply CANNOT do this and expect it to work. The easiest solution is to search out primers on the internet on proper SSTV operation. Many sites give you a step through on how to enjoy this wonderful mode.

82. More on SSTV Musing's

Yahoo group: CQ100_QsoNet
Date: 2006-12-07 21:29:34 UTC
From: vk1ac
Topic: 80 Message: 82

Another quirk about sending digital modes on CQ100 is the audio shaping that goes on in the codecs. We've have brilliant success with RTTY just by changing the Mark tones down to 1000Hz.

Seems that CQ100 has a sloped cutoff around 2100-2300Hz that plays havoc with regular RTTY. (watch the spectrum display on MMSSTV) Changing the tone frequency a bit lower gets you right into the 'sweet spot'.

The PSK guys don't see it as much (error correction) but I'd say it causes a bit of picture degrading & sync loss on SSTV too.

Cheers,

Alex VK1AC

90. aining a numbered award Numbered Awards for QSOnet contacts

Yahoo group: CQ100_QsoNet
Date: 2006-12-10 18:57:51 UTC
From: wb5kykvoip
Topic: 90 Message: 90

If you are interested in obtaining a NUMBERED award for contacts made on Qsonet send me a email for details ! These awards will be NUMBERED for various modes and bands on Qsonet. Send an email to : wb5kyk@... for information on requirements for a WAC, DXCC, WAZ and WAS award that will be NUMBERED and dated. Who will have #1 ???? 73 and happy holidays and pass the word on about this new challenge.

91. RF Link ing Gateway

Yahoo group: CQ100_QsoNet
Date: 2006-12-11 01:42:38 UTC
From: g3vfp
Topic: 91 Message: 91

Hi guys.

I have run my rf linking gateway for the last couple of months or so on QSONET, and would like to thank all those who called in for a qso, or simply called in :-). The fact is there has been virtually no response from the local rf users in my area of West Lancashire in the North West Of England, and as such frustrating both for those of you who have called through it looking for contacts, and myself.

It is my belief that rf gateways and repeater linking into the system is a great asset, but the truth remains in the old saying "You can take a horse to water, but you can't make it drink". Such is life even in our great hobby.

It is with that in mind that I have decided to close the rf gateway of G3VFP which was running on 29.610 on QSONET, and on 145.2125Mhz on rf.

Thank you sincerely for your support.

Best Regards,

Dave G3VFP

My impression is that gateways are under- used, we have eqso 2mrt
gateway here in Canterbury (Kent). Very few people ever use it,although
the gateway keeper is very keen to keep it going. It has got a bit
better since Ofcom have allowed unattended operation. I know this doesnt
help but just say your not alone. Some repeaters are going the same
way.

Hi Sam

Well of course I cannot read into the minds of other radio hams hi, and have met, been involved in clubs, newsgroups etc since I got my ticket in 1966. I have been running rf gateways on both my frequencies since before Echolink, and have run one on Echolink on 70Cms since its inception, and prior to / subsequent to running QSONET on 2m I ran EQso on that frequency. I also listen to the IRLP gateways in our locality, and what I can tell you is, the lack of interest has nothing to do with QSONET, it is an apathy which guys have concerning the general rf use of voip systems, or even operating on the bands themselves. If you go into the English 101 conference room on EQSo you can sit there all evening listening only to the 30 or more rf gateways connected radios silence :-). Only using that as a prime example, I'm not knocking EQso.

Goodness knows why guys want to sit, and listen instead of being involved in qso's. But the stats on any ham voip system point to more listeners than talkers by very wide ratios :-)

If you watch the activity on QSONET, it is minimal in comparison to either who may be listening at any moment, or compared to the number of stations registered to use it. It is no different for other systems as I have said, and pro rata to the overall size in members.

If one has a local rf repeater supported either by it's own club, or paying membership, and that repeater has a voip point of access, then it kinda supports itself from it's own rf users. However that can, and quite

often does go one of two ways eventually. Either the locals drop off using it, or not responding to internet based calls, or you get a political infight between rf users of a repeater, and those voip users (from whatever system they come in from), as the local rf users may call them, interupting our repeater :-).

So Sam, it isn't only my experience, but a lot of other sysops. That have gone in wide eyed and bushy tailed thinking quite rightly this voip / rf technology is the bees knees, everyone will want to use our gateways. You see the same scenario being repeated over and over :-)....just call me cynical.

It's like watching the rise and fall of empires, or conferences on Echolink.

Well you did ask for my thoughts Sam :-)

You guys take care out there, and those who do, have a great Christmas.
The truth is out there....somewhere :-).

Dave G3VFP

Hi Sam

Well of course I cannot read into the minds of other radio hams hi, and have met, been involved in clubs, newsgroups etc since I got my ticket in 1966. I have been running rf gateways on both my frequencies since before Echolink, and have run one on Echolink on 70Cms since its inception, and prior to / subsequent to running QSONET on 2m I ran EQso on that frequency. I also listen to the IRLP gateways in our locality, and what I can tell you is, the lack of interest has nothing to do with QSONET, it is an apathy which guys have concerning the general rf use of voip systems, or even operating on the bands themselves. If you go into the English 101 conference room on EQSo you can sit there all evening listening only to the 30 or more rf gateways connected radios silence :-). Only using that as a prime example, I'm not knocking EQso.

Goodness knows why guys want to sit, and listen instead of being involved in qso's. But the stats on any ham voip system point to more listeners than talkers by very wide ratios :-)

If you watch the activity on QSONET, it is minimal in comparison to either who may be listening at any moment, or compared to the number of stations registered to use it. It is no different for other systems as I have said,

and pro rata to the overall size in members.

If one has a local rf repeater supported either by it's own club, or paying membership, and that repeater has a voip point of access, then it kinda supports itself from it's own rf users. However that can, and quite often does go one of two ways eventually. Either the locals drop off using it, or not responding to internet based calls, or you get a political infight between rf users of a repeater, and those voip users (from whatever system they come in from), as the local rf users may call them, interupting our repeater :-).

So Sam, it isn't only my experience, but a lot of other sysops. That have gone in wide eyed and bushy tailed thinking quite rightly this voip / rf technology is the bees knees, everyone will want to use our gateways. You see the same scenario being repeated over and over :-)....just call me cynical.

It's like watching the rise and fall of empires, or conferences on Echolink.

Well you did ask for my thoughts Sam :-)

You guys take care out there, and those who do, have a great Christmas.
The truth is out there....somewhere :-).

Dave G3VFP

> GONE BEFORE i KNEW IT WAS EVEN THERE BEST WISHES TO YOU AND YOURS
> 73 RON nf2o

Ahhh Ron, and guys. If this is of interest, take time to actually read what I am saying. Don't jump paragraphs, or misinterpret me, as this is a pretty factual assesment from my viewpoint.

It wasn't the lack of user support from QSONET, it was the local rf interest that was lacking. Nothing whatsoever wrong with the guys on QSONET. I have and will continue to have great qso's with the guys I'm sure. Just that I didn't want to submit them to calling through my gateway, and end up talking to themselves, or me all the time hi. After all a person will only do that a few times, and then quite righly get bored, and go to find a qso elsewhere hi.... well you know what I mean :-).

So rf gateways or repeaters are great on QSONET, as long as they have good local ham support. Like the guys do on 29.680 for example. In fact in the QSONET environment duplex rf repeaters are better placed because they invariably have local qso's taking place which show up on QSONET, and guys get to know they are active, and they can join in.

But not quite the same with rf gateways, which are still repeaters in this scenario, but simplex ones. ie in/out on the same rf freq, and they don't have the same local rf user draw, or attraction if you like that full rf duplex repeaters have. Consequently the rf gateway sits there in silence or the occasional audio ident, and because of that it's prescence in QSONET as a system isn't seen very often.

Whereas on other systems like EQso, or Echolink, their prescence is known whether they are in use or not at the time, because when they are logged in they are listed on screen, so it isn't as difficult as QSONET, where no one knows whether you are there or not if there is no rf useage, or qso taking place....I hope that explains it Ron, and I hope it gives other guys an insight into rf gateway / repeaters in QSONET.

You say if you are patient, then users will come to you, and expand the useage of your rf gateway. You will have to forgive me Ron because I am going to say you are not wrong exactly, but you could be. I'm smiling when I say that, there is no upper cased text hi.

I will explain.

Whilst my rf gateway was new to QSONET two months or so ago, it wasn't new to the local rf fraternity on two meters around here, as it has been active on rf for quite some time, either on EQso or Echolink, so the locals knew it was there. In fact they couldn't miss it because I have a good local rf location, and there has been activity on it from those systems, as there was from QSONET from time to time.

But it is a fact Ron, that without good local club type rf user support, and having those guys there on the rf end for QSONET guys, or any other voip system guys to talk to, but especially for the reason I outlined above for QSONET, then guys may only be talking to you. You are probably a hell of a nice guy to chat to, and some QSONET guys will come back from time to time to have qso's with you, but if there is no one there when you are away, or no other personalities for guys to chat to....then it dies.

I actually had a lot of fun doing it Ron, and from a selfish standpoint I suppose I could still be running it, as I can walk around the house, nip out in the car, and still chat. But when there is only me to talk to, it isn't as much fun for anyone else hi. I think I have an okay outgoing sort of personality, but then I may be boring to others hi. I am not trying to put you off Ron, or having a go at you in any way whatsoever, all I am doing is portraying what I have found to be the case after years of running rf gateways, and hey! it may be just me :-). But if others have done the same on other systems, then by all means come in and tell me I am mistaken :-).... Debate is great :-)

Take care out there. We love ham radio :-)

105. 29.600 is for Voice calling?

Yahoo group: CQ100_QsoNet
Date: 2006-12-19 13:17:25 UTC
From: Toshiaki Tamura
Topic: 105 Message: 105

Dear all,

Acording to QsoNet Frequency guide available in Files section, 29.600 is set for voice calling frequency. However, there is no sign or display on the 29MHz band of CQ100.
Is this rule authorized by the CQ100 developer, or just an inter-group rule?

Regards,
Toshi,(JN2UNC)

Hello Dave,

Listen for Paul - W8EXG or myself, VK1AC on 14.085, which is the same place you'd find me on LSB HF. We're not here all the time, but that's where we hang out of we're doing RTTY.

And have you dropped your Mark tone to 1000Hz? You'll get much better results on CQ100 as the codec 'sweet spot' is much lower than the normal RTTY tone frequency.

Cheers,

Alex - VK1AC / WD9AND

120. QSO & Repeater

Yahoo group: CQ100_QsoNet
Date: 2006-12-24 00:20:09 UTC
From: kd7ikz
Topic: 120 Message: 120

Hi all
New to the group. QSO is great. I like it better then echolink. I would like to run it on my repeater but I don't know what I need to do it. I tryed it but the vox would cut in and out and I could get audio from the repeater but not from QSO back to the repeater. It would not key up the repeater. Is there anyone that has it on a repeater that can help.
Thanks
Bob

my limited understanding is that currently the best way is to just use the
keyers sidetone audio and the normal mike to soundcard method.

I understand there are some timing delays that need to be overcome if attempting
to use the serial port. Much like the timing delay when using cwcom. more info

Topic: 124 Message: 125

Dave,

I don't believe CQ100 has any time-out function. Many users - including me - turn it on and listen for hours.

I believe you may have experienced a disconnect from some other event, possibly a dial-up inactivity (if you use dial-up service), a DSP PPP/PPO disconnect if your DSL authorization account was not setup properly, a disconnect generated by some other application, or an improper Internet Explorer setting. There might be more scenarios that could be the culprit.

So, I am very sure that what you experienced is not CQ100 related.

Regards,

Joe, N2QOJ

129. MFJ401C

Yahoo group: CQ100_QsoNet
Date: 2007-01-09 12:31:52 UTC
From: Art Marshall
Topic: 129 Message: 129

I am still trying to hook up my MFJ401C keyer to use with CQ100. I am picking up the audio off of the speaker wires and feeding it into the mic jack of my sound card. I have tried a two circuit plug and a three circuit plug going into the sound card. I have lots ov hum which when I put the CQ100 transciver into VOX the hum keys the transciver. I have played with the vol controls and can reduce the hum, but just cant get rid of the hum.

Any sugestions, tks 73's, Art W1FJI

guessing here.....
sounds like a ground loop
I think I remember folks using a capacitor to fix other hum problems
I think it's used to ground but I'm not sure?

I must agree with Sam, improper grounding will give you the hum problem.

Also, once grounding is properly addressed, try the line-in of the computer rather than the microphone input. Adjust CQ100 audio in to see the line-in input. Do a little searching via Google regarding audio interconnects to get some ideas on simple attenuation techniques and mic versus line-input considerations.

Also, you may want to isolate the audio from the computer via a 1:1 audio transformer. Proper grounding, a good input level match, and proper isolation usually resolves interconnect issues.

133. PROBLEMS GETTING ONTO SERVER

Yahoo group: CQ100_QsoNet
Date: 2007-01-21 19:53:29 UTC
From: Andy
Topic: 133 Message: 133

Hi all
I am having problems getting onto CQ100.It seem to be only in the evenings or at busy times.
I go into the programm and can see stations on the scale but when i click onto them i hear nothing.
Has anyone else had this problem and is there a cure apart from changing providers hi.

Cheers Andy G6OHM.

Andy,

Follow this link and be sure to read the entire thread - that's two pages of messages....

http://www.qsonet.com/qbb/viewtopic.php?t=477&postdays=0&postorder=asc&start=0

Be sure to paste this link into your browser's URL window completely and correctly.

I think you're problem (and solution) may be addressed in that discussion.

Art,

I'll assume you've watched the polarity on your audio out to the two pole plug. Be sure you've attached the speaker positive to both the ring and tip connections of the three pole plug. On most soundcards, they expect audio on both the left and right mike connections... miss one and you have an open audio circuit with hum.

I'd be using some sort of shielded audio cable for this too.

Cheers,

Alex - VK1AC / WD9AND

Art:
Also, if you are feeding into the 'mike' line, use the 3 pole plug. try a 2.2k ohm resister from each 'hot' line to ground for mike matching and bringing the open/antenna down to earth! Couple to either or both lines with an isolation capacitor(s) for isolation. That should help on the hum. Also may have to parallel a cap across the unused matching resister might also help. I would think it would be better to use the 'line-in' instead and adjust the gain from there. Try it and let us know.

139. [CQ100_QsoNet] QsoNet_CQ100 group name/addresses have changed

Yahoo group: CQ100_QsoNet
Date: 2007-01-31 17:49:37 UTC
From: notify@yahoogroups.com
Topic: 139 Message: 139

Hello,

The moderator of the QsoNet_CQ100 group has changed the group's name.
This means that both the group's email address and the group home page
location have changed.

The group email address:
CQ100_QsoNet@yahoogroups.com

The group home page location:
http://groups.yahoo.com/group/CQ100_QsoNet

If you have links which point to this group or an address book entry
for the group, you should update them, as the old addresses will no
longer work.

Regards,

Yahoo! Groups Customer Care

Hi Folks,

As the announcement indicates, I've changed the name of the Group
from "QsoNet_CQ100" to "CQ100_QsoNet".

Now, if someone should search YAHOO Groups directory for "CQ100",
they will find our Group - the original and largest YAHOO User Group
for CQ100 Users.

Please update your links to our Group and especially our email
address in your address book.

Regards,

Joe, N2QOJ - Owner and Moderator of CQ100_QsoNet
jsammartino@...

Please dis-regard! No one is being requested to unsubscribe!!!!

A member requested to unsubscribe from the Group but he did it incorrectly. He posted his request to the Group instead of sending the request in the apppropriate manner.

So, dis-regard that prior posting. It is not intended for the Group.

Thank you, N2QOJ - Moderator

Hello Santiago,

These are the instructions for payment that Doug, VE3EFC, creator of QsoNet, advises:

Sign-in to your account page and click the button "How To Pay".
You will see details for five (5) ways to pay.

https://qsonet.com/account.php

For approximate currency conversion visit http://xe.com

If you still have problems, please contact Doug directly. This is the contact information listed at www.qsonet.com:

CorMac Technologies Inc.
34 North Cumberland Street
Thunder Bay, ON P7A 4L3
Canada

Please show your callsign on all emails, faxes and postal mail.

Sorry we do not provide any technical support by telephone. Please use email instead.

Email: douglas "at" qsonet.com
Fax: (807) 345-7114

Good luck, Joe - N2QOJ, Moderator

Folks - Here's a brief summary of some nets and other frequency activity of interest. A PDF version of this information is in the "files" section of the Group.

Regards, Joe - N2QOJ, Moderator

QsoNet_Frequency Guide

3.578 Voice Calling Frequency for French speaking Canadian Hams (VE2EC)- Fréquences d'appel pour les Canadiens français

3.685 International Short Wave League, members and guests welcome, Weekly, Thursdays, 19:00 Zulu. For more info, contact G6XOU

3.699 Finnish Stations

3.710 Royal Airforce Amateur Radio Society Net, Weekly, Wednesday, 20:00 Zulu, RAFARS and ex-RAFARS welcome. Contact G0DNI (RAFARS 3968) for more info.

3.780 Swiss Stations - ? Contact HB9ANF

3.780 Voice Calling Frequency for French speaking Canadian Hams (VE2EC) - Fréquences d'appel pour les Canadiens français

3.710 Swedish Speaking Hams - Här gaggar vi om allt möjligt, långa pass accepterade men är det ring så visas hänsyn till de andra.

14.058 CW Calling Frequency

14.070 QVE3D CW Beacon ☐ Code Practice

14.080 QVE3A CW Beacon ☐ Code Practice

14.090 QVE3B CW Beacon ☐ Code Practice

14.144 Slavic speaking HAMs daily - Net is supported by BalkanDX Reflector, on Yahoo since 1999 with 250 members worldwide.

14.200 Official QsoNet Voice Calling Frequency

14.222 German Speaking Stations, Treffpunkt aller
Deutschsprachigen, vorzugsweise (aber nicht nur) jeweils 22 Minuten
nach jeder vollen Stunde. Originator ☐ OE5AKM, Alfred

14.275 KC9HRO Net ☐ All Welcome, Tuesday ☐ 00:30 Zulu

14.294 Royal Navy Amateur Radio Society Calling Frequency (Not Verified)

14.300 Firefighters Net ☐ Daily, 21:00 Zulu

21.100 Retired NAVY, Open to all Military, 8:00, 12:00, 16:00 EST (1300/1700/2100Zulu), Originator ☐ W7HN

29.600 Voice Calling Frequency (Informal)

29.620 MHz XE2MCC Mexico Link... more info needed

29.660 MHz KI4HPL Spanish Link... more info needed

29.660 MHz XE1ENF Spanish Link... more info needed

157. RTTY and/or PSK31

Yahoo group: CQ100_QsoNet
Date: 2007-02-16 16:07:26 UTC
From: Ken Michaelson
Topic: 157 Message: 157

Hi all. I am a new member and I wonder if anyone can help. I want to use RTTY and/or PSK31 on the displayed console. I have seen that someone has managed to make PSK31 (Digipan ?) work, but I can't find any info as to how to do it. I would like to get Logger32 into the console but I have no idea how to start. Any help gratefully received. TIA 73s de Ken G3RDG.

Ken, all oyu have to do is load a PSK 31 program on your computer and then bring up the CQ100 xceiver and be sure you are on ssb and then tune to 14.070 and bring up your PSK 31 program and start working psk 31 ! I use WinPsk 2.1 and it works great and is simple to use. Larry , wb5kyk

160. New On CQ100

Yahoo group: CQ100_QsoNet
Date: 2007-02-17 20:18:43 UTC
From: Dan Hensley
Topic: 160 Message: 160

Hello fellow amateurs!

I just downloaded CQ100 today, and got set up after an intial registration problem that Doug was so kind in being fast to fix! Doug, you've created a nice program and it is much appreciated, and extremely useful!

My first contact here was K1LCH-Terry, from the waterway radio net. Terry was a great guy to talk to, and very intelligent about everything.

I like the program because even though it is direct VOIP and not live, it is good for arranging on-air qso's, and making other kinds of contacts that end up on air.

Now if I could just get eqso registration straightened out!

In the meantime, i'm gonna leave my http behind here: http://www.freewebs.com/kc9kow

73 everyone!

Dan

Both seem to be right - sort of!

This is the information posted at QsoNet.com Discussion Board:

29.268 MHz Waterway Radio Cruising Club link to 7.268 MHz, 0745 ET

I was not aware that QSONet was linking to REAL RF.

Let me assure you that the Subject Net (on HF) is strictly LISTEN
ONLY!

I.E. No Techs can access HF RF.

Enjoy the Waterway Net at 29.268 MHz (Virtual) and listen to the
private boats cruising in the SW North Atlantic, Bahamas, Carribean,
and the Gulf of Mexico check-in from their far flung locations.

73 de K1LCH

So, it seems that it will be 29.68 Mhz on QsoNet and linked to 7.268
Mhz in the real world. That is my take on it.

Here is the link to the discussion:

http://www.qsonet.com/qbb/viewtopic.php?t=617&highlight=waterway

I guess you can try to contact K1LCH directly.

Good luck - N2QOJ

167. Waterway Radio Cruising Club

Yahoo group: CQ100_QsoNet
Date: 2007-02-22 03:22:43 UTC
From: terrypalmer2
Topic: 167 Message: 167

The WRCC is broadcast on CQ100 freq of 29.268 MHz at 0745 ET, daily.
The beacon may be up earlier with some weather reports and informal
QSOs.

Freq and operation has been approved by Doug (CQ100 Manager).

Terry Palmer, K1LCH
Sponsoring Person

From: terrypalmer2
Topic: 167 Message: 170

No, the Net is just being rebroadcast for LISTENING ONLY and is not being CONDUCTED on the CQ100. The purpose of the broadcast is so cruisers off their boats i.e. in hospital, visiting relatives, away from their ham gear, etc can tune in and keep up to date on WRCC doings including the locations of their friends as they move throughout the SW No. Atlantic, Carib Sea, and the Gulf of Mexico.

There is the opportunity for WRCC members to have QSOs on other adjacent freqs before the net and on 29.268 Mhz after the Net. The calling freq will be 10 KHz up (29.278 MHz) when the Net Beacon is up at approx 0600 - 0830 ET.

Note: This may have limited interest to non-WRCC members; however, listen in if you like.

Terry, K1LCH

Hi Dan,
Yes you can use PSK on CQ100, by using your favorite PSK Program and
the CQ100 program., a RF setup is not used.
The main difference in using PSK on CQ100 and a rig on RF, you need
to put CQ100 into transmit before sending CQ or any text.. also make
sure you go back to receive when your sending of PSK is finished,
obvious I know, I have already made this mistake
Setting your sound card is the most important, you can use microphone
setting and audio from your speakers, the best setting is to use
stereo mix.

Paul -

I signed up a while ago, but there has been no activity.

YOU ARE THE FIRST! So the Group is still registered.....but, apparently not being used.

The Doug's QSO.net Discussion group is fairly active and that is where I think everyone is communicating.

P.S. Come see my broadcast of the Waterway Radio Cruising Club on CQ100 freq. of 29.268 MHz at 0745 ET everyday.

Got to admit propagation on 40 Mtrs (7.268) has been horrible and it will be evident if you tune in.

Good luck.

Terry K1LCH

178. Psk31 active on 14.070

Yahoo group: CQ100_QsoNet

CQ100 Users,

Several CQ100 users have been active on PSK31 on the calling frequency of 14.070. In the last 24 hours I have been able to QSO with G0VVA, WB4RQD,W4WXA,XE1ENF,K2ENY, MW1CPU, KC7KTT,PE2AAB and I0DZR. Several other stations have come on freq but I could not complete a QSO, probably because their sound levels or stereo mix input was not set properly.
Please be advised that the CQ100 freq. seems to drift and you may have to manually retune your reader.

I hope that more users will join us.

73,

Ted ks9xh

184. Digital Modes on CQ100

Yahoo group: CQ100_QsoNet
Date: 2007-04-01 11:18:57 UTC
From: brtdvd4
Topic: 184 Message: 184

Hello to everyone ...
My name is Dave and my call is N9BUB ... there are 3 modes of digital communications I enjoy ... RTTY ... PSK ... CW ... I think CQ100 is a great piece of software and maybe the best that has come along for hams both without the availability of outside antennas and also hams on vacation or traveling ... I looked the other day and there are apparently 11k + members of CQ100 .. I certainly don't see that many on the "air" .. I have made some 38 contacts on CQ100 in my spare time in the last 4 months ... most of them have been CW on 14.058 mhz and just recently Ted KD9XH has stirred some PSK31 activity on 14.070 mhz.. I gess my question is this ... my favorite mode is RTTY and I have been calling CQ on 14.086 mhz (the standard call freq on reg HF) with absolutely NO response for almost a week now .. is there no one on CQ100 that uses RTTY ??? I use MMTTY software which is extremely easy to setup and I also have pix of the 5 setup pages I would be glad to share with interested parties if they would send me thier email address ... tnx for your time .. hope to hear some of you on CQ100... I will be on 14.086 mhz calling CQ ...

73 es GD DX
de N9BUB
Dave

Hi Dave,

I see from the message archives that 14.085 was mentioned a couple of times by some other RTTY interested folks. Give that a try.

You are correct, this is a good place to drum up activity. Let's hear from other digital mode, especially RTTY, interested folks in response to Dave's message.

Maybe you folks can get together and schedule a net that I can place into our Group Calendar.

Best of luck, Joe - N2QOJ

The three CW beacons seem to have relocated to 14.040 to 14.050.

PSK 31 Calling Freq is 14.070

SSTV has some activity on 14.230

Lee,

You raise a good question, and at this time you have also raised my curiosity in the same interest. At this time, I don't know of anything of the sort, but maybe it could be added to the list of projects for the CQ100 staff to work on?

200. Need QSO In Digital Mode

Yahoo group: CQ100_QsoNet
Date: 2007-04-11 18:27:47 UTC
From: Dan Hensley
Topic: 200 Message: 200

I'm looking for a QSO in one of the compatible digital modes on CQ100 that needs to last at least 30 minutes and needs to be acknowledged by a QSL card either digital or paper.

Reason: I'm working on the SPAR RCC Award, and am hoping to get the digital endorsement.

So, anyone wishing to do PSK, CW, etc. please let me know.

Topic: 207 Message: 211

The following stations checked into the PSK 31 Net on 14 April

W1GNS, VK6CP, M0BHA, G3RDG, W2WXP, W4MQC, K3KGX, N4LCC, KB3NPH, KD9XH.

There were at least 2 other stations that appeared on frequenccy but
did not check in.

Overall it was a good first try at a PSK Net with three continents
represented. We are considering holding the Net on a regular basis,
possibly weekly.

Any suggestions or comments are welcome.

Topic: 212 Message: 212

This is to invite all of you who reside in the limits of the City of Chicago and the near suburbs from north to south and those in the western suburbs near Chicago to join the Chicago And Suburban Echolink Group.

The group focuses on the uses, improvement on, and technical knowledge of Echolink and EchoIRLP. We also focus on applying all of this in the context of emergency communications in time of need...should it be a natural emergency, or something man - made.

Come and check us out! Lots of fun lies ahead!

213. Why so few users of CQ100?

Yahoo group: CQ100_QsoNet
Date: 2007-04-16 11:20:16 UTC
From: G3XBM
Topic: 213 Message: 213

Although I occasionally use this system I am surprised how few users are on at any time: a few lines apear on 80m, maybe 1 or 2 on 40m, around 10 at most on 20m and perhaps 1 or 2 on 29MHz.

This system is SO GOOD that I am amazed it is not humming with hundreds or even thousands of users, especially at the very lowest point in the sunspot cycle when real radio contacts are quite hard on much above 14MHz.

Does this system need to be plugged more in the ham media? Although it is most definitely not "real radio" it is a very good next best thing for serious chatting with fellow hams and I feel it is suffering from under-exposure!

Hi Roger

If you look at the numbers registered I think you will find quite a number, but guys use it like you and I do, and consequently are only around spasmodically.

The other reason I guess is apathy hi, also you will probably find for every one talking there are 20 sandbagging hi. Certainly around here that is the case, as I have even heard locals on 2m talking about qso's they have listened to on QSONet yet I have never seen their calls online chatting :-).

All good fun :-)

Regards

Dave G3VFP

It's not completely "real radio", but there are RF links on the system, which is why you need a license just for the software. There were something like 12,000 stations on the system last I heard, or something close to that.

I never have a problem finding people to talk to!

Most of the activity is on 20M...never a problem with calling cq forever, someone always answers. You'll find alot of activity on 10M too! Just gotta look around.

G3XBM <rogerlapthorn@...> wrote: Although I occasionally use this system I am surprised how few users

around 10 at most on 20m and perhaps 1 or 2 on 29MHz.

This system is SO GOOD that I am amazed it is not humming with
hundreds or even thousands of users, especially at the very lowest
point in the sunspot cycle when real radio contacts are quite hard on
much above 14MHz.

Does this system need to be plugged more in the ham media? Although it
is most definitely not "real radio" it is a very good next best thing
for serious chatting with fellow hams and I feel it is suffering from
under-exposure!

Hard to say. I broadcast the Waterway Radio & Cruising Club on CQ100 at 29.268 mHz every day at 0745 ET (EDST at present). I thought it would really catch on with the Sailors that are off their boats away from radio equipment. There are a few dedicated listeners; but not near as many as I thought there would be.

I listen on 14.200 but don't chat very often. The UK seems to be having lots of fun with CQ100.

Love it as another ave of commo. If you are in a wi-fi hotspot, you can't get out with EchoLink (because of port problem); no problem for CQ100 as ports are not an issue. I talked to a buddy at an airport while I was in a shopping mall on CQ100.

I don't use it because during the trial period I was only able
to make one contact. Why should I pay for software where
I can make only one contact in 90 days when EchoLink does that for free?

Recently there was a similar thread on the QSONet/CQ100 Forums. Doug responded to one of the posts saying that there are now 2000 paid members and 4000 other members still on their trial period.

He also said that he monitors the system and has noted 300 users logged in and only 6 "spikes".

One final stat. At startup he had 100 new users/day but now is only getting 25/day.

The title of this thread could also be "Why so few users of CQ100 Yahoo Groups and the QSONet forums?"

I think you will see similar stats with Echolink. The system has grown but fewer people are connecting to links and repeaters. I use to have 10-20 connects a day and now 3-4. Yahoo groups do the same! Such as it is with anything new. 73 Johnny

There is more to life than just CQ100. Family, job, health, and financial concerns...along with other hobbies and committments may reduce ones time on the air.

I'm disabled, with several health issues, and those keep me from being at the computer for extended periods of time. This reduces my involvement with my ham radio/telnet weather computer bulletin board system (BBS), as well as with Echolink and packet...the latter are my only operating modes due to power and antenna restrictions at the QTH.

I've got the software on my system, but never really installed or worked with it, because of the above reasons. I tell a similar story to those so involved in creating BBS doorgames...that's not all there is to life.

Topic: 226 Message: 226

It would be wonderful if I were able to shrink the display of the transceiver. I find that using MixW there is just not enough room on my screen..Although I can shrink MixW it is awkward to get the display of 'On the air' to show properly. And since I have to be 'On the air' to transmit, I have to be very careful. Is it possible ??

Ken,

Well, I looked into this a bit.

Go here and download Auto Window Manager:

http://www.eusing.com/WindowManager/WindowManager.htm

It will let you resize the window a bit. However, it does not resize proportionately (meaning the content of the window does not shrink in the window) as a window that was designed to do it.

But, if you just want to shrink so its on the desktop and active while you have MixW open, then it will work!

Play with the horizontal and/or vertical settings until you get it the way you want.

For me, I just adjusted vertical setting until I had a thin CQ100 dashboard across the top of my desktop.

Let us know if that helps,

Oh yes, the program is free but runs a nag screen on startup. It's a neat little program with lots of capabilities.

UPDATE to Freq for WWRC:

The freq has been changed to 7.268 Mhz with permission of Doug, VE3EFC. This now agrees with the Real Freq on your Real Ham Xcvr.

The CQ100 beacon will go up at approx 0715 ET, the official WRCC Net starts at 0745 ET and lasts till about 0830.

Enjoy.

Paul, sorry you have not had a response to your question yet from the Group.

I think the short answer should be "yes". Any digital mode app employing the sound card methods similar to MiXW, CWGet, etc., should work in the same manner. If you follow the general setup instructions regarding audio settings for those programs, it should work for another program using the same audio components.

Let us know how you do.

Thanks to Barry for the I.P.RADIO plug, and to Dave I have to add that probably what you heard was a replay of the Amateur Radio Newsline, The Rain Report, Solder Smoke and the FCC enforcement lists. I play these all weekend around the clock, every weekend. So that EVERYONE can have a chance to listen to them without having to be on a certain NET at a certain TIME, You can listen when you have time to listen not when someone else has time to play them. I play them on I.P.RADIO VOIP in the NewsLine channel and I have that CROSSLINKED to QSONet 28.537 and eQSO RFConnect as previously mentioned by Barry.

Thanks for noticing and listening, and again thanks to Barry.

239. PLEASE take me OFF your SPAM list

Yahoo group: CQ100_QsoNet
Date: 2007-07-20 07:58:21 UTC
From: jasinnj2000
Topic: 226 Message: 239

Well this was an interesting reply!

Dave, OM, I don't have a clue to what you are talking about. This is a YAHOO Group with distribution capabilities for its members. The term "SPAM" usually refers to unsolicited junk in your inbox. Since you had joined this Group, one would assume that you would want to receive its members' posts.

Also, I don't have any nets and as far as I can tell, our calendar is not set to send reminders about anything at any time. If any you members are receiving reminders from this Group, please let me know.

Dave, in reviewing some of your previous posts, it would appear that you don't have a clue either. So we are in the same boat - we both don't have a clue regarding your posts.

As for your request to be removed, I am happy to oblige. It seems that removing yourself is also a challenge.

Cheers

Well written response..... looks like he must have been having a bad day or something.....no group announcements go out as far as I know, at least to me. I had a period where I did not have CQ100 on a computer cause I had not paid my fees yet but I stayed with the Yahoo group because I knew I would be back and the group is a very low volume group when it comes to emails....if someone cannot hear a net there can only be a few reasons....your on the wrong freq setting....your soundcard is not working.....your home clock is off.....or maybe your simply not connected to the Internet....or one's hearing aide simply is not turned on (a little humor here to lighten the heaviness of the topic hi hi) as a Priest I am a member of the fire fighters net and listen to it nearly every day on 14.300 and have never had a problem in any fashion...I am thankful to the CQ100 author and those volunteers who help make it a grand success....and the Moderators here.....thank you and job well done! 73 Johnny KD5LWU Cortez, Colorado

Absofreekinglutely well said Johnny

I have never ever experienced any non wanted posts from this or any other group I belong to. A moderators job is never easy, and does not warrant verbal attack in any event.

243. revising CQ100_QsoNet Frequency Guide

Yahoo group: CQ100_QsoNet
Date: 2007-09-13 15:26:51 UTC
From: jasinnj2000
Topic: 243 Message: 243

Folks,

It's time to update our net/CQ100 Frequency list.

If you don't have a copy of the current version, just visit the
Group's file section to download a copy:

http://groups.yahoo.com/group/CQ100_QsoNet/files/

Please post any changes or any Net information that you would like to
see in the revised document.

Actually, anything that you think would be a value to our member such
as beacons, Linked stations, scheduled nets, etc.

Thanks in advance,

Your moderator, Joe, N2QOJ

Hi Terry,

Thanks for the plug. I see that you have meet Jim, WA7RVV here in
Spokane also. I have been sick and just getting better when the flue
got me. Hope to chat with you soon some were on the band.

I see you got it working and with the Q call on it nice work my
friend.

Posted: Thu Nov 01, 2007 2:25 pm Post subject: help with vista
and Realtek high definition sound card

---

this is really strange people, I can't get into my sound card mixers.
can not find them. I am using vista. I want to get the cq100 program
to communicate with CWGET. its funny too, when i am in the voice
portion of the program, i can see it registering onthe wave forms of
the CWGET program, but when i go to cw. nothing registers. Anybody
care to speculate on how to fix this problem? thanks, john kb3hqh
CQ100 register user. I am using a Realtek high defintion sound card.
when i unplug the mike, and open the CWGET program again, i get a
window that says no audi input.????

Back to top

""I can't get into my sound card mixers. can not find them. I am using vista.""

If you are trying to get to your sound card mixers thru the "?" on top left of CQ100, you will be unsuccessful. To access the sound card mixers in Vista, you have to right-click the speaker icon in the lower right corner and this will lead you to all audio mixers.....the display will be quite different from XP.

You can call me on CQ100 every morning on 7.278 Mhz from 0715 - 0830 ET and I monitor CQ100 on 14200 all day and you might catch me if I am near the computer. I am on EchoLink all day too.

I know that the QSL issue has been talked over in the past, but I just noticed that eQSL has added several new modes per the ADIF 2.1.9 specification. It does not list CQ100 by name, but it does add a VOI mode option. Just thought I would pass the information along.

Are any of you still using CQ100 as you did before?

Have you seen a downturn in use overall?

I've seen less spikes at night, I guess the air waves are getting
better, but I have mine on everyday, but I do more listening than I do
talking if I have nothing to contribute to the conversation, I find
some of the conversation very interesting to listen too.

I find that most of us listen as I do the same . It has been mentioned
before that a lot of us Listen. I still use it and have even used it
mobile. works great with my mobile pc I use for testing cell sites. I
use a Broadband Aircard Sierra 650 EVDO. It just rips along, I can
keep in contact for hours. Its a good system and I think it should be
incorporated into existing Radio architecture Like the Icom 756
series; so all that one has to do is hook the antenna to it for RF or
an Aircard for mobile use or Broadband Ethernet Cat 5 connection at
home. would be a cool radio.

Yeh isnt it a hoot, Ive really seen the use for it.. and the ham bands
are great and so is voip which this uses (cq100). The best part of
CQ100 I have found is that I can get on it and listen to it w/0 having
to setup special ports and VPN filtering problems that arise when
using Echolink while on a secure connection (VPN) to my company I work
for. It works like im out in the open WEB! Without Causing the open
Internet problems that I could bring in being in the open on the
company computer.

John,

Your request for info was forwarded to Doug, VE3EFC, creator of CQ100.

Most questions regarding subscribing, updates, etc. can be answered by visiting the official QsoNet site at www.qsonet.com.

I'm sure there will be others with a similar need to change their registered call sign so please post what you learn from Doug so we can all benefit.

Thanks,

Joe, N2QOJ - Moderator

I've checked the CQ100 forum and found out the following:

If you are already registered with QsoNet and want to change your call sign, you need to send an email directly to Doug, VE3EFC , with your details. Be sure to note your old call sign and new call sign!

You can send it to Doug at douglas (at) qsonet (dot) com.

Re: the Freq Guide for QSONet.

I thought I had sent in the following change; WRCC is no longer on 29.268 mHz as Doug now allows Retrans of live RF on the lower bands, so we now broadcast the WRCC Net on 7.268 mHz (same as live HF freq).

Please put following in the Guide:

""7.268 Waterway Radio Cruising Club (WRCC) of 7.268 MHz HF RF is broadcast on this frequency daily at 0745 to 0830 ET. The Control Operator stands by up 10 KHz at 7278 MHz for any comments or messages to be exchanged with the private yachts in the Atlantic, Caribbean, and Gulf of Mexico. The ID Beacon is up at 0715 ET.""

Jasin - Note we use ET for Eastern Time as whether it's EST or EDST, it starts at 0745.

Thanks.

Terry K1LCH

Folks,

The Frequency Guide and Net List has been revised to reflect Terry's
input regarding the WRCC Net's CQ100 frequency of re-transmission at
7.268 - same as the RF net.

You can find it in the file section at:

http://groups.yahoo.com/group/CQ100_QsoNet/files/QsoNet_CQ100_Frequency%20Guide.pdf

Joe -

Let's try a link to: The Revised QSONET retrans policy and the Specific approval for the WRCC Net to be on 7.268 MHz FYI.

http://qsonet.com/qbb/viewtopic.php?t=704

The "mht" file extension worked on Vista but not on XP; it's not a virus, just disregard it and have a look at above link.

Terry

Hi guys

I was away from CQ100 for a couple of months, but just renewed my subscription, and back like the bad penny :-)

Cheers

Dave G3VFP

David:
The net is doing well. I hope to hear you on CQ100 again very soon. the net meets on 14.180 @ 0300, 1500 and 2100 UTC DAILY . Sometimes we have a lot of stations and at other times none or just one or two but it seems to be working ! It is very laid back BUT some good dx and some of the rarer states check in. I can't look your call up on eQsl to see if you are a member but if you are not I encourage you to register with them (it is free) and to get a certificate of authenticity for your qsl so you can qsl with the stations you work electronically, it is all FREE. 73 and tell others about the CQ100 DX/ WAS net. 73, Larry, K5ZRK

From: sm5euu
Topic: 306 Message: 306

Hello

My call is SM5EUU, and I joined the QsoNet yesterday, got accepted, and had my first contact last night with a station with an unfamiliar call - ZRAA3810. I asked him about his call, but did not get a proper answer, so my question to this list is if it was a real amateur or if I managed to have my first contact on CQ100 with a "black-foot". Another thing that made me suspicious was that he thought I was a German station. A real ham would know that SM stands for Sweden, or?

Aha! There's another thing. Since it was my very first contact I asked about logging, but he said he did not log his contacts. So I did not log him either - but we started our conversation at 21.36UT. His name was not Greg, but something similar, and he said he was in South Africa.

You do perhaps not log your contacts, but I am sure now that I ought to keep some sort of record. Well, I have things to learn although I have been licensed since 1971. :-)

Kirstin -

The following is an immediate answer from Doug (CQ100 Manager) about your Query.
Doug is very good about answering msgs promptly.

From VE3EFC, Doug:

Hi Terry,

Thanks for telling me. I have removed him now.

His callsign showed Garth in Glencairn.
His documentation appears to be some sort of CB license.
I guess I was in a hurry and did not check closely.
I get a lot of these CB licenses from South America. I always reject them.

73, Doug

Richard:
It is nice to hear from you again. I have changed my call back to my old call I originally received in 1958 and it is K5ZRK. I am also located in Ms. now at one of my homes up here and plan to stay (famous last words for a gypsy !). I am on CQ100 EVERYDAY . I am net control for the CQ100 DX/WAS net that meets 3 times a day on 14.180. The net times are 0300 UTC, 1500 UTC and 2100 UTC. Tell your friends about the net and we would love to have all of you guys to check in with us.
Be safe on your trip home Richard and probably the new call was what threw you, it is not new but it is different from when we worked probably. Hope to see you on the net and hope that you have had a nice winter in TX. 73 and good DX, K5ZRK, Larry

Starting Monday on 21.200 at 8 MDT 02:00 Z

Purpose of the net to encourage the use of the band and increase the activity on the band.

Come and join us beginning this Monday April 7 at 02:00Z on 21.200.

317. DIGITAL/CW Contest for CQ-100 confirmed April 12 & 13

Yahoo group: CQ100_QsoNet
Date: 2008-04-04 10:13:20 UTC
From: Tim Browning
Topic: 317 Message: 317

The Digital/cw contest for CQ-100 users is now confirmed and will be going as planned from 0000 UTC Saturday April 12 (midnight Friday) to 0000 UTC April 14 (Midnight Sunday) The following are the rules for the contest. One added thing, when submitting logs to EQSL, please make sure the propagation mode is set to INTERNET. If this is not done, the log will not be accepted. Now for the rules:

Sponsor: CQ-100, eQSL.cc, and the PSK/Digital Users Net
Contacts must be made between Saturday April 12, 2008 at 00:00UTC and Monday April 14, 2008 at 00:00UTC

Description: CQ100 Digital/CW contest. Open to all CQ100 users and covers all CQ100 frequency bands.

You must apply for this contest on this page before April 18 at 23:59 UTC

Fees:

Entry Fee: $0.00
Print-Your-Own Participation Certificate: $0.00 (anybody)
Print-Your-Own Certificate: $0.00 (winners only)

There will be:
1 Overall winner(s)

Contacts must be confirmed by an eQSL in your InBox or Archive that you have not rejected.
Scoring is as follows:

6 points for contacts made with digital/image modes
4 points for contacts made with CW

Multipliers:

1 multiplier for each State, VE Province, or DX Country (AK and HI count as countries) per band

Bonus points:

150 points for contacts with KB3NPH
10 points for contacts with Authentity Guaranteed members
200 points if you have Authenticity Guaranteed

Log in and go to www.eQSL.cc/eContest for details and to apply!

If you have any questions, check into the PSK/DIGITAL net on Saturday monrings at 0900 EDT on 14.070 on CQ-100. If you can not check in via

psk, you can wait till we qsy to 14.105 for the voice portion of our net. You can also get information by e-mailing me at KB3NPH@....

73s and Good Contesting,
Tim (KB3NPH)

319. CQ100 DX/WAS NET dx/was STANDING LISTING

Yahoo group: CQ100_QsoNet
Date: 2008-04-06 17:03:39 UTC
From: southernhermit
Topic: 319 Message: 319

Starting April 11 a listing will be posted as to standing in Dx countries worked, states worked. This list will be of the top TEN stations. All you need to do is sent me an email listing your countires and states total (please note if the total is for state or countries). and if you have worked all continents . All contacts must be made on CQ100. The contacts do not have to be made on the CQ100 DX/WAS net. We are all hams here, so no qsl is required , please be accurate and honest with your reporting. Your word is enough. Remember these contacts must be made on CQ100 (no eQso, Echolink, etc). The dead line for receiving your totals for the first listing is April 10, 24 UTC. The CQ100 DX/WAS net meets DAILY on 14.180 at 0300, 1500 and 2100 UTC. Come and join us, all are welcome. 73 and good dx, Larry K5ZRK

320. CQ100 DX/WAS net to discontinue

Dear Larry,

I came to know your DX/WAS net meeting recently. This is very nice plan for CQ100 users, especially for begginers. I missed your net meeting anounce @14180 today, but I will try to take part in the next chance.

As not everyone registerd himself as a CQ100 yahoo group member, your DX/WAS is not popular yet at this moment, so please make a reminder call at 14.200 for a few minutes before starting DX/WAS.

I would like to help you to make CQ100 international and more active.

This really speaks to the state of Amateur Radio as a whole. Nobody cares anymore. I guess I came into it about 10-years too late. I will not spend another $32 on the 28th. I was going to let it lapse and then I found this net. but Larry is right, nobody was interested. I'm going to go back to Shortwave, I can't talk to anyone but I will get a QSL card for a report. In 2-years I was only able to get 10 cards out of hundreds of VHF SSB, CQ-100, and CW contacts. Time to break out my Grundig Satellit 800 and get back to SWL.

I just got into CQ100, because I can't use Echolink with my laptop and an aircard...and wanted something to use when I travel, or do portable demonstrations. I personally thought that CQ100 would do nice on my train trips later this year...one of these is to a hamfest!!

However, I had zapped Comcast Cable in March, because of extremely poor service...so, I had to get an aircard just to check email and do my web pages. But, in order to add Echolink to a local club 2 meter net, I have to try to get some high speed internet, and alternatives to Comcast aren't here yet. The aircard gets very erratic at times, and I don't know if the weather is to blame or not. We've had so much severe weather here since February, that I've been off the internet (and off the air) more than on!!

I myself have been in the hobby in 1991...first as a No-Code Technician...mainly to help with Skywarn Severe Weather operations in central Arkansas. After my XYL died last year (the 3rd death in the family in 7 months), I decided, on a lark, to try and upgrade. Using HamTestOnline, I upgraded to General 2 weeks after signing up with them, and to Amateur Extra 13 days later. Unfortunately, where I live (H.U.D. subsidized housing for the disabled and the elderly), outside antennas aren't allowed. So, while I have an HF station, I can't do much HF work. And, unless I can get high speed Internet for an Echolink node, CQ100 will be my only choice...it'll have to be when I'm on vacation.

Hello all and thanks for reading.
I am new to CQ100 but I am already finding the cw practice beacons to be of great help. I have been taking down the cw on a morning before I go to work. What I would like to know is does a text file appear anywhere to check against what has been sent and what I have taken down. I can get some of the fast stuff where the same words are sent a few times but I sometimes fail totally and I would like to know the word/ words that I have missed?
I am sorry if there is a posting somewhere telling me this information and I have missed it? A bit like my cw, hi.
Thanks again, Bill G0BAK, Leeds, UK.

Why not use a program like CwGet to copy the code and then check your
hand copy aginst it or else use Hamscope and do the same thing - Larry,

You may need to go into your sound card's volume control and turn on the "Stereo Mix" (or, in some cases it is called "what you hear is what you get"). That allows the audio output of CQ100 to be fed back into the inout for the particular ham software you are using. It works for me using Multipsk and Hamscope.

I couldn't agree more...as I *AM* in such a situation (H.U.D. subsidized housing for the disabled). They don't allow outide antennas, but it's just as well...lightning seems attracted to the place like bees to nectar.

Another PLUS for CQ100 is that some aircards do NOT allow router connections, as such as REQUIRED by Echolink. CQ100 has no such router requirement.

In my case, I plan to use CQ100 on my laptop later this year on several train trips I have scheduled. That way, I can save the Yaesu VX-150 to monitor the railroad bands, while I'm in my Sleeping Car compartment. It's also great for a portable demonstration setup...and you can use it to test/work with all modes, digital and otherwise.

Absolutely Dave

not only having CQ100, but all the other voip radio internet linking systems too. It is all too easy for guys who have no problems either with their health, or antennas/equipment or location to pooh foo these systems, but the reality is they can be a lifesaver for our fellow ham brothers for sure, and they that put it down shouldn't lose track of the fact we joined this hobby to communicate with like minded individuals whether that be on direct rf or via these great systems.

You guys take care out there, and when I free myself up from some of my projects here I will get back into the swim :-).

Best Regards to all.

344. Who is the top dxer on CQ100

Yahoo group: CQ100_QsoNet
Date: 2008-04-29 19:55:40 UTC
From: southernhermit
Topic: 344 Message: 344

I offered last month to collect the data needed to post the stations call, the number of countries they have worked , the number of states they have worked and if they had wored all contients , I got some response. I will do this again this month and will post the list on May 1 so if you are interested in getting listed, drop me and EMAIL with the needed information and on May 1 it will be posted. No log required, we are all hams and your word is enough. Who is the top dxer on CQ100? Sent in your totals and find out- Larry , K5ZRK

It generally means a station that is not in one's own country or if you are using rf on vhf/uhf a station that is beyond the normal ground wave range I would say. DX is radio slang for distance, plain and simple if oyu are seeking a definition. Larry, K5ZRK

Simply " a station that is not in your own country ". Same as on rf and it has been that way for YEARS. The US would be a dx station for Canada. How many different countries have you worked would perhaps be a better way to phrase the question. Larry, K5ZRK

358. CQ100 DX/WAS LISTING

Yahoo group: CQ100_QsoNet
Date: 2008-05-01 00:25:07 UTC
From: southernhermit
Topic: 358 Message: 358

CQ100 DX/WAS STANDINGS

Dx

*K5ZRK- 31 (all phone)
G0GUF - 9 (all cw)

WAS

K5ZRK- 40 (all phone)

* denotes worked all continents
If you wish to have your standings listed, drop me an email and it will be listed on the 1st of the month. I was hoping for more but we have to start some place. I know there is one station that has more countries than I do and one station that has more states. This will be done on the first of the month each month if there is any interest, 73, K5ZRK

359. CQ100 on Train Trips

Yahoo group: CQ100_QsoNet
Date: 2008-05-10 10:17:57 UTC
From: Daryl Stout
Topic: 359 Message: 359

I've got 4 separate Amtrak train trips scheduled for later this year (I don't fly anymore)...and since I can't use Echolink on my laptop with my aircard, CQ100 was the logical choice.

I plan to use the laptop with CQ100 on portions of the trips, while listening to the train activity on my Yaesu VX-150...all from the comfort of my Sleeping Car compartment during the trip, and possibly from the hotels at my destinations.

More details will be posted on these trips as they gets closer.

Daryl, N5VLZ

From: Daryl Stout
Topic: 359 Message: 361

Hi, Joe...

>Daryl - Thanks for the input on mobile CQ100 usage ---

First, I apologize for the long reply. I've used mainly Echolink, but used CQ100 last night on my laptop from the house, while storms were in the area (we've had more than our share of severe weather this spring in Arkansas). Now, when I go mobile (as on the vacation trips noted below), I'll have a choice. I also want to learn how to use the digital modes (PSK31) with CQ100, so I can do it on HF.

>Sprint air cards, you can use
>Echolink without any problem. The Sprint air service is a public IP

Sprint did me DIRTY several years ago. It was the original cellphone service myself and my late XYL had. But, when declining health forced me to resign from a job I had held for over 18 years (I'm now fully disabled), I told them I could either pay the final bill or the termination fee, but not both. They said that was OK...but still billed me for both!! That left a bad taste in my mouth, and I swore I'd never use Sprint again. I went to Cingular (now AT&T), and have been with them ever since.

>short, any broadband service where you do not have access to port
>configurations, Proxy service is needed.

I appreciated the clarification on that, as I thought I'd have to install and set up something else, so that's why I went with CQ100. There may be some times were I can't get to a proxy server (Echolink), so CQ100 will be my option with the aircard.

As noted, it'll be used from my laptop with my aircard on the Amtrak Trains on my trips, or at the B.E.A.R.S. Field Day Site in Wichita, Kansas this year...even though I'll be in town for the National Square Dance Convention. I can alternate between listening to the trains on my Yaesu VX-150, and then either Echolink or CQ100 on the laptop. I remember on a train trip I did to Portland, Oregon, back in 1994 (for the National Square Dance Convention that year), that when I checked into a net on my HT as "N5VLZ Amtrak Mobile", I generated a pile-up ("can we cut the net short, and work this guy??") (hi hi).

>consider setting up your own Proxy service.

When I go away, I usually unplug everything...computer, ham gear, etc. Where I live is an apartment complex for the elderly and disabled (I've been fully disabled since 2004), and there are a lot of trees around the complex..perfect lightning targets. A strike last July 29 (the same day I upgraded to General Class, after being with HamTestOnline for just 2 weeks), a strike to a tree on the southwest side of my apartment building (4 apartments per building) zapped numerous electronic equipment devices in mine, and adjacent buildings. Thankfully, all of my stuff was unplugged, so I didn't lose a thing. I've heard too many horror stories with lightning strikes, and it isn't worth the risk.

Schedule, health, and finance wise, I don't travel that much (I'm lucky to be able to drive acrss Pulaski County, where Little Rock is)...but I have 4 train trips, and 1 bus trip scheduled this year. If I build up enough Amtrak Guest Rewards credits by next summer, I may take a circle trip across the western US...going Sleeping Car for the privacy and free meals. :) Incidentally, after passing my General Class exam, I said "I've got to go for it all now", and BARELY passed my Extra on August 11. Now, I serve as an accredited ARRL/VEC Amateur Extra Class VE...which has been very rewarding.

>there are very few of us operating CQ100 via laptop mobile, it becomes an
>interesting QSO discussion.

One of the local groups did a couple of mini Field Day type settings recently, called "Hamming In The Park". When they do one again, I can either use CQ100 or Echolink. I take the laptop with me to VE Test Sessions to verify callsigns on QRZ, etc. I haven't done much HF, CQ100, packet, or Echolink lately, due to other things...but of all the things I've done in ham radio, the VE Testing has been the most enjoyable, since I got accredited last year. Then, I can tell of, and demonstrate to, the new licensees, all the fun things you can do in ham radio. Another nice thing with CQ100, similar to Echolink Single User Mode...no additional wires, equipment, antennas, etc. are required.

>Daryl - please share with us some highlights of your CQ100 mobile operation
>when you can.

For the record, here's a schedule of trips that I have coming up...where I'll have the laptop with me, and where I'll work either CQ100 or Echolink..depending on aircard connections, and what mood I'm in (hi hi). What I may do is split things up between Echolink and CQ100. The neat thing I've noted about CQ100 is that you don't have to worry so much about "doubling", as you do on Echolink.

I haven't decided on a frequency on CQ100...however, I'd appreciate suggestions on this. :) If I use Echolink, it'll be under the N5VLZ callsign, and the caption will be "Amtrak Mobile", or something similar. I don't know how to modify the location settings in CQ100 on this, as it has "Little Rock, Arkansas" and my homepage as its "location" right now.

On the trips, usage will be from my Sleeping Car Compartment on the train, the hotel, or at another location...and it'll dependent on schedules, meal times (you don't call me late for dinner (hi hi)), etc. Total trip length dates (travel to/from the event, and the event itself), in U.S. Central Time, are noted below. The only travel exception is the Nashville, Tennessee trip, which has to be by bus. I probably won't work it on the bus, as the laptop only runs for about 90 minutes on battery backup...and it's at least 8 hours between Little Rock and Nashville.

1) Wichita, Kansas for the National Square Dance Convention, and part of the B.E.A.R.S. Club Field Day N0W operation, June 22 to July 1. I figured since I upgraded from Technician to Amateur Extra last summer, that I might as well use the privileges, and this will be my first Field Day operation. I normally don't do outside events, as I'm sensitive to hot weather, and allergic to stinging insects.

2) Austin, Texas for their Summerfest (hamfest) and Texas VHF-FM Society Meeting, July 31 through August 3.

3) Nashville, Tennessee for the National Singles Square Dance Convention, August 28 through Sept. 1.

4) Denver, Colorado for the National Underwater Marine Association Convention (a belated birthday present trip with my Mom), October 6 through 15.

5) Orlando, Florida to visit my in-laws...who I haven't seen since my XYL passed away just over a year ago...I still call them every few days, though.

I have a fresh logbook, and a lot of QSL cards available, so I'll be busy

73,

Daryl, N5VLZ

362. CQ100 Nets and Modes

Yahoo group: CQ100_QsoNet
Date: 2008-05-22 03:22:05 UTC
From: Daryl Stout
Topic: 362 Message: 362

Is there a file or a message listing all the nets on CQ100?? I found some in the frequency guide, but I'm sure that there are more. I have started checking into the "awful awful ugly net #2" in the evenings, and am enjoying myself with it.

In the next two weeks, I hope to test the aircard on my laptop (prior to the first of several planned trips), to be sure things will work with it.

I'm also curious as to CQ100 working with such programs as DigiPan or MixW. The reason for this is that on my Amtrak Train Trips, the Sleeping Car compartment walls aren't that thick, so I will obviously have to go "digital" to keep the noise down...even though I will have a headset mic.

I have been mentioning CQ100 on the Echolink Nets I've been checking into, so I don't know if we'll see some new users or not. But, if I can't get the Echolink proxy deal to work, CQ100 will be a nice alternative...and a requirement after 9pm local time.

Schedule wise, it'll depend on how the train is running, on whether I operate Echolink or CQ100...but it's practically guaranteed that anything from 9pm to 7am on the train will have to be done via CQ100 and digital modes (PSK31, etc.).

Any comments would be greatly appreciated.

73,

Daryl, N5VLZ

I've got the schedule for the trip all set...it'll depend on how Amtrak is running, time wise. Unfortunately, outside the northeast corridor in the U.S. (where Amtrak owns the track), the tracks are owned by freight railroads...and more often than not, Amtrak gets put in the siding for the freight trains.

To me, that seems stupid, as most Amtrak trains are shorter than freights, and are going faster. On a recent video I saw on "The Tropicana Juice Train" (which runs from Bradenton, Florida, where Tropicana is located), on the CSX Railroad, only Amtrak has higher priority than the Tropicana Juice Train. The Juice Train" has 500 tons of orange juice, running in refrigerator cars, which it has to be kept chilled all the way to its destination. I did hear of where a commuter railroad engineer (who was a licensed ham) had a rig in the locomotive...and between stations, he was carrying on a QSO. Of course, he had to also pay attention to the signals, etc. along the tracks.

Anyway, schedule wise, I have a total of 4 train trips from Little Rock as noted below:

1) June 22-25, to Newton, Kansas (then shuttle bus to Wichita), for the National Square Dance Convention...but I will try to work the N0W Special Event Station some, on Friday and Saturday, June 27 and 28. The return trip is June 29-July 1.

2) July 31, to Austin, Texas, for the Texas VHF Society Convention, part of the Austin Summerfest. The return trip is August 3. I will be helping them with VE Testing while I'm there.

3) Oct. 6-9, to Denver, Colorado, for the National Underwater Marine Association Convention. This is a belated birthday present for my Mom. The group, led by Dr. Clive Cussler, deals with finding shipwrecks, etc. The return trip is Oct. 12-15.

4) Oct. 21-24 to Orlando, Florida (then a short ride to Apopka, where my in-laws live). While I call them nearly every day, I have not seen them since my XYL died 13 months ago...and would like to see them one more time, and visit my late XYLs grave...she was studying for her Technician Class license when she died 3 weeks shy of our 4th wedding anniversary. The return trip is Oct. 27-30.

On trips 1 and 3, I have to do an overnight stay in Chicago in both directions, due to scheduling...so those nights, I may check into nets from the motel. Trip 2 is a 15 hour ride, with no change in trains. Trip 4 requires changes in Chicago and Washington in both directions, but I have sufficient time to make the connections.

Departure wise, trip 2 departs at 3:10am CDT...all the other trips depart at 11:35pm CDT, from Little Rock. Again, there are if the train is on time.

Daryl, N5VLZ

365. CQ100 WAS/DX TOTAL LISTING

Yahoo group: CQ100_QsoNet
Date: 2008-05-25 14:12:00 UTC
From: southernhermit
Topic: 365 Message: 365

Ok, it will soon be the first of the month again and if you are interested in having your DX/WAS worked totals listed this month please send me and email and let me know your totals. Also please let me know if you have worked all the contentients. These contacts are C100 contacts only! I do not need a copy of log data just the numbe of countries you have worked and the number of states. We are hams here and your word is good enough . Let's see who the real dxer's are on CQ100. Please have your data in by 2400 UTC on May 31. 73 and good dx-

I got the same thing last night (May 31) around 7pm Central Time, when I tried to start the program. I understand the server and the website were down. I don't know if they've been fixed at this typing (6:15pm CDT June 1)..I had Echolink Nets to run last night, and we had severe storms move through today, so my computer was down much of the day.

381. A Note Of Thanks

Yahoo group: CQ100_QsoNet
Date: 2008-06-04 15:23:19 UTC
From: Daryl Stout
Topic: 381 Message: 381

I'm sure everyone in this group will join me in extending a heartfelt THANK YOU to all those who worked over the weekend to get CQ100 back up and running...both the program and the website.

As per previous messages, it appeared that both would be out for a week, but everything was back up last night (Tuesday). I heard several comments on nets that "it was greatly missed", and how "everyone is glad it is back up". Everyone is also thankful for the fact that it appears no one was injured...even though there was site and equipment damage from the fire and explosion from the electrical short, where the server was location, in Houston, Texas. And, it wasn't just CQ100 that was affected...many others were as well.

I also want to thank Doug, VE3EFC, who designed the program, and for his efforts as well. I definitely will be using CQ100 on upcoming train trips this year...especially with its versatility to do voice, data (PSK31, CW, etc.), and now QSO TV. Now, to find time to test things out on the laptop before the first trip in just over 2 weeks!!

73,

Daryl, N5VLZ

>What frequency or band will you be on on your train trip?????????

To avoid conflicting with another net that I do on CQ100, I most likely will use 3.821 -- 3821 was the FIDONet BBS Network identifier for Little Rock. Speaking of nets, around 0100 UTC Tuesday, I will try to check into the Trains and Railroads Net on the N9PMR-R system. Then, I run the AAU Net #2 on 3.855 at 0130 UTC Wednesday. I don't think tunnels will be an issue on this segment of the trip, but things could change. I don't know how close the train will run to its schedule; but I do know after 0200 UTC, that when I'm on the train, I'll have to switch to PSK31 with Digipan...and I still have to install and test that. The UTC times are approximate, and subject to change.

Even though I've ridden the train many times, bumpy tracks can make for a sleepless night. The same "QRT Time" (0300 UTC) will probably apply when I'm at the hotel as well. I will try to operate from the Sleeping Car Passenger Private Lounge at Chicago Union Station, but there's no guarantee on that. Also, with late evening or overnight departures, I doubt I'll operate until sometime after breakfast the next morning. Then, there'll be a downtime for the various meals during the day and evening. Prior to arriving in Chicago, I'll have to shut things down. I also have to decide on a frequency for PSK31 operation for an hour after 0200 UTC each day.

Day/Date: UTC: Comments:

Sun 6/22 0430 Depart Little Rock, Arkansas on Amtrak.
1230 Breakfast at St. Louis, Missouri...will begin operating sometime after breakfast.
1600 Lunch at Lincoln, Illinois...will return to operations after lunch, but will curtail it prior to Chicago arrival.
1915 Arrive in Chicago...overnight stay. Will operate from hotel until around 0300 UTC. Dinner break around 2300 UTC.

Mon 6/23 1800 Possible operation from Sleeping Car Passenger Lounge at Chicago Union Station.
2015 Depart Chicago, Illinois on Amtrak.
2300 Dinner at Galesburg, Illinois.

Tue 6/24 0200 Switch to PSK31 operation.
0300 QRT for night, due to overnight arrival in Newton.
0830 Arrive in Newton, Kansas.

While in Wichita, I don't know how much I'll operate CQ100 or Echolink. While I'll be in town mainly for the National Square Dance Convention, I do plan to visit the B.E.A.R.S. Field Day site either Friday or Saturday, or both. They will have a Special Event Station Friday through Sunday, June 27-29, along with their Field Day setup...all using the callsign N0W. Health, weather, and scheduling will play a part, so I'm not sure when I'll operate.

Sun 6/29 0800 Depart Newton, Kansas on Amtrak.
1230 Breakfast at Kansas City, Missouri...will begin operating sometime after breakfast.

1710 Lunch at Galesburg, Illinois.
2020 Arrive in Chicago...overnight stay. Will operate from hotel until around 0300 UTC. Dinner break around 2300 UTC.

Mon 6/30 1600 Possible operation from Sleeping Car Passenger Lounge at Chicago Union Station.
1845 Depart Chicago, Illinois on Amtrak.
2315 Dinner at Alton, Illinois.

Tue 7/1 0200 Switch to PSK31 operation.
0300 QRT for night, due to overnight arrival in Little Rock.
0815 Arrive in Little Rock, Arkansas.

I probably will crash out when I get home, but I will be back on the air that evening on 3.855 for the AAU Net #2. I have 3 additional train trips planned later this year...but will wait until these get closer before posting the itinerary on them.

387. Amtrak Mobile Trip To Kansas Cancelled

Yahoo group: CQ100_QsoNet
Date: 2008-06-18 00:06:15 UTC
From: Daryl Stout
Topic: 387 Message: 387

After evaluating several factors, I decided to CANCEL the Amtrak Mobile Trip to Kansas, scheduled for June 22 through July 1. These factors were:

1) Severe flooding on the upper Mississippi River, cancelling Amtrak Service on The Empire Builder, The California Zephyr, and The Southwest Chief...and this may last awhile.

2) Substitution of Thruway Buses on affected routes, but not for all areas...I don't do well on buses anymore, due to arthritis in my legs.

3) Lack of both Sleeping Car space on the "back door route" from Little Rock to Newton, via San Antonio and Los Angeles, and the time to prepare for it.

I also cancelled a "bus trip" to Nashville in late August.

However, I still have 3 Amtrak trips planned, as follows:

A) Austin Summerfest and Texas VHF Society Convention, July 31 through August 3, Austin, Texas.

B) National Underwater Marine Association Convention, Denver, Colorado, Oct. 6-15.

C) Trip to visit my in-laws and late XYLs grave in Orlando (Apopka), Florida, Oct. 21-30.

I will post a revised schedule and operating frequencies for the above trips as they get closer. I have prepared a special EQSL card for it...but these won't be processed until after each trip ends.

Sorry for any inconvenience...while I can control health issues with medications, weather is something I have no control over.

Daryl,

Sorry to hear about these cancellations.

I hope you are able to recoup and schedule alternate trips in the days ahead.

I'm sure there are others - besides myself - that are looking forward to your trip notes.

And I hope all is well medically too -------

Regards,

Joe, N2QOJ

Hi, Joe...

>Sorry to hear about these cancellations.

I hated to do it, but I don't do well on buses...and for that matter, would not have been able to operate that way anyway. Basically, just like regular HF operations, Mother Nature does not want to cooperate.
>
>I hope you are able to recoup and schedule alternate trips in the
>days ahead.

I got the full rail fare back on the Kansas trip, but lost the cost of one of the hotels. A bit of advice here...if you go to book a room with a lodging property, and they have a "no refunds whatsoever" policy, I'd find another place to stay. I wonder if they would have still held that line, if a tornado had destroyed the property??

>I'm sure there are others - besides myself - that are looking forward
>to your trip notes.

I've still got a trip to the Austin, Texas Summerfest (including the Texas State Convention and Texas VHF Society meeting), as well as the trips to Denver and Orlando set for October...so, all is not lost. I'm doing some research into a possible "Hamtrak" trip next spring to ARRL Headquarters. However, I would have to pay for part of the trip, as the "U.S. Northeast Corridor" is a separate zone, as it were. And, I'd have to possibly spend a night each way in Washington, DC, because of scheduling. But, I won't be able to make final plans on that until at least next March.

I did design a neat EQSL card that I'll be using for it...if you want, I can post what it'll look like in the forum library. I did test CQ100 on the laptop with my aircard the other day, and verified that it did work. Now, I have to integrate Digipan for PSK31 and the QSO_TV as well, where I can post pictures taken with the digital camera.
>
>And I hope all is well medically too -------
>
I've had a lot of headaches lately, mainly for all the weather changes. I'm going to get my beard and moustache removed, and my head shaved tomorrow No, I haven't joined a religious cult or gone off the deep end (hi hi)...it's a way for me to try to keep cool. Besides, it'll grow back in a month.

I'd like that as well...and I could add them to the page I already have with Echolink Nets (www.wx1der.com/elk.htm). It wouldn't be much of a problem to modify the page for it. The only CQ100 nets I know of right now are a PSK31 net on Saturday, then a Christian Net Monday through Saturday.

399. Integrating Other Programs With CQ100

Yahoo group: CQ100_QsoNet
Date: 2008-07-17 17:37:20 UTC
From: Daryl Stout
Topic: 399 Message: 399

I understand that with CQ100, one can integrate other programs to "add features" to it...such as:

1) Digipan to do PSK31
2) QSO_TV to do Amateur TV
3) CWGet to copy CW QSOs

If someone can direct me to the appropriate messages or files, I'd greatly appreciate it. Health issues make it difficult to copy CW without some kind of aid.

If I can get items 1 and 2 implemented before my first of four Amtrak Mobile Train Trips during the next 9 months, it might allow me to operate more than just phone, as it were. A sample EQSL card is under my callsign on the QRZ website.

I will post the schedule and frequency for the Amtrak Mobile Austin, Texas trip sometime this weekend...since that trip is now less than 2 weeks away. Two of the other trips aren't until October, and the final one isn't until next April...so, I won't post those just yet.

Hi Daryl,

If you go to my website, www.kb3nph.com, there is a page that explains in detail how to set up external software, such as digipan, multipsk, and others, to work with CQ-100. There's estensive written instructions and links to screenshots on how to do it.

Hope it helps,

73sw

I saw the link on internet and ham radio, and I agree with your assessment. While the "purists" will say that VoIP is not amateur radio, if you're in a situation like I am (no outside antennas allowed), VoIP modes are the next best thing.

Do I need to check the message forums on your website for that information??

I saw a link to "forums", but I'm not sure if that's it or not...I'm still waiting on a clarification message.

Granted, the other modes would be nice on the Amtrak Mobile trips, but if all I can do is operate phone on CQ100, that's fine as well.

406. My CQ100 Amtrak Mobile Operations

Yahoo group: CQ100_QsoNet
Date: 2008-07-18 20:52:12 UTC
From: Daryl Stout
Topic: 406 Message: 406

First off, I apologize for the length of this message.

The following dates and times in UTC are when I hope to be operating Amtrak Mobile, via CQ100. I know that the "purists" say that "this isn't amateur radio"...but this is really the only way I can operate...and making a contact on a trip like this, is really a "novelty". I have 4 train trips planned between now, and April, 2009. An extra Amtrak Guest Rewards trip is possible sometime next summer, but I won't be able to make plans for that until March, 2009, at the earliest.

The frequency chosen is 3.821 on the CQ100 80 meter Voice band. The reason I'm using CQ100 is that I could NOT get Echolink to work with my aircard on my laptop, even through a proxy server; and the reason I chose 3.821 is because that was the one time FIDONet computer bulletin board system (BBS) Network Identifier for the Little Rock, Arkansas area.

Operations will begin shortly after breakfast local time, and I'll operate prior to lunch. Afterwards, I'll operate until before dinner, and for a short time after that. The operating times depend on the trains schedule, aircard reception conditions, plus personal health issues, and are NOT guaranteed. If the train is late, these times will change. If I get back from the meal break early, then I'll start operating before the times noted. The earlier I get to the Dining Car, the earlier I can resume operations afterwards...as most all Amtrak trains have been sold out months in advance of late.

Dining Car hours vary by train, schedule, etc., and are usually from 6:30am to 9:30am for breakfast, 12 Noon until 1:30pm for lunch, and 5:30pm to 8:30pm for dinner...all local time. I will be traveling mainly in the U.S. and Central and Eastern Time Zones...what travel I do in the Mountain Time Zone will not permit me to operate.

Take note that NO OPERATIONS will occur between 0200 and 1300 UTC each day...and that I will END operations approximately 30 minutes prior to my final destination on that trip segment. If this "end time" is during a "meal break", there will be no further operations on that segment after that time. If you don't hear or see me on 3.821, just try again later. I will also try to operate from the Sleeping Car Passenger Lounges at Union Station in both Chicago, Illinois, and Washington, DC...and at the hotels at my various destinations...but as noted above, this is NOT guaranteed.

I will process the EQSLs after arriving at my destination, and will ONLY doing EQSLs at www.eqsl.cc -- you can sign up free of charge,

although you won't be able to do as much, QSL card wise, with just a "basic" membership. For the record, my EQSL card was done with just a "Silver" membership. A sample of the EQSL Card that I'll be using is located under my callsign, N5VLZ, on the qrz.com website.

The trips all originate at Little Rock, Arkansas. Unless there are circumstances requiring cancellation, the trips are as follows (travel times to and from the events are included):

July 31 through August 3, 2008 - Austin, Texas Summerfest. The 2008 ARRL Texas State Convention and the Texas VHF Society Meeting will also be held in conjunction with this event...which occurs on August 1 and 2...and I'll be assisting with VE Testing on August 2. The train departs Little Rock at 0810 UTC July 31, arriving in Austin at 0000 UTC August 1. The return trip leaves Austin at 1430 UTC August 3, and arrives back to Little Rock at 0435 UTC August 4.

October 6 through 15, 2008 - National Underwater Marine Association Convention in Denver, Colorado - a belated birthday present for my Mom...she and I will be traveling together on this trip. The train departs Little Rock at 0435 UTC Oct. 7, and arrival in Chicago at 1915 UTC Oct. 7, with an overnight stay. We leave out Oct. 8 at 1900 UTC, arriving in Denver at 1315 UTC Oct. 9. The return trip leaves Denver at 0210 UTC Oct. 13, arriving in Chicago at 2050 UTC, with an overnight stay. We leave out Oct. 14 at 1845 UTC, with arrival in Little Rock at 0810 UTC Oct. 15.

October 21 through 30, 2008 - Trip to visit my late XYL's grave, and her parents, in Apopka, Florida...plus visiting some hams in that area that I've met on CQ100. The train departs Little Rock at 0435 UTC Oct. 22, arriving in Chicago at 1915 UTC. It departs Chicago at 0005 UTC Oct. 23, arriving in Washington, DC at 1630 UTC. It leaves Washington at 2330 UTC, arriving in Orlando at 1755 UTC Oct. 24. I'll be staying at my in-laws home while there. The return trip leaves Orlando at 1755 UTC Oct. 27, arriving in Washington, DC at 1145 UTC Oct. 28. It leaves Washington at 2005 UTC, arriving in Chicago at 1340 UTC Oct. 29. The train departs Chicago at 1845 UTC Oct. 29, arriving in Little Rock at 0810 UTC Oct. 30.

April 16 through 23, 2009 - Trip to ARRL Headquarters in Newington, Connecticut. The train departs Little Rock at 0435 UTC April 17, arriving in Chicago at 1915 UTC. It leaves Chicago at 0005 UTC April 18, arriving in Washington, DC at 1730 UTC. It leaves Washington, DC at 2025 UTC, and arrives at Hartford at 0255 UTC April 19. I will try to operate from the hotel on Sunday, April 19...and I hope to operate W1AW when I'm at ARRL Headquarters on Monday, April 20. On Tuesday, April 21, the train departs Hartford at 1025 UTC, arriving in Washington, DC at 1700 UTC. It leaves Washington, DC at 2005 UTC, arriving in Chicago at 1940 UTC April 22. It leaves Chicago at 1945 UTC, arriving in Little Rock at 0810 UTC, April 23.

Health and financial concerns may greatly limit future Amtrak trips, and as noted on the sample EQSL Card, I only operate on CQ100 or on Echolink...what little RF is done is in the central Arkansas area. If you have any questions, please email me at the address on the card.

73,

Daryl, N5VLZ
Little Rock, Arkansas

Hi again Daryl,

Go to my website. On the main page there is a menu on the left. Select the tab that says "Internet and Ham Radio".

That opens up another page. Again on the left right under Internet and Ham Radio you will see a sub-page called "CQ-100 -Virtual HF". Click on that tab and you will be in the page that explains how to set up the external programs. In all the examples I have used the program MultiPSK as the program I use for doing digital, etc on CQ-100, but the procedure to get ANY, of the available software to work is virtually the same. Digipan, DX Lab's Winwarbler, Mix@, CWget... all those interface exactly the same. If you have any more problems, you can contact me direct via E-Mail at KB3NPH@... or on Saturday Mornings at 0900 EDT we have a PSK/DIGITAL net on CQ-100 on the 20 meter band frequency 14.070. It starts with a PSK check-in and a quick round of comments, then we QSY to 14.105 for VOICE. If you can't check in using PSK, goto 14.105 and we will have a voice roundtable there. That usually starts anytime between 9:15 to 9:30, depending on the number of checkins we have in PSK mode. Hope to see you there.

I found the tab, in a message from Joe, from the CQ100 Yahoo Group. I already tested it out with CWGet, and just need to get the DigiPan and QSO_TV deal set up, and I'll be all set.

>KB3NPH@... or on Saturday Mornings at 0900 EDT we have a PSK/DIGITAL
>net on CQ-100 on the 20 meter band frequency 14.070. It starts with a PSK

That's one I've been wanting to check into...but with the trouble I've had sleeping at night, it's hard for me to get started that early. The only reason I'm up now (5am CDT Saturday) is from a nightmare, a headache, and a nature call...those all seem to come hand in hand (sigh!).

I was wondering if there's another "frequency" for PSK31 besides the traditional 14.070 one noted...and am going to start using CQ100 more than I am now.

I had to sell my HF station, due to a lack of time to work it...a local ham is going to get some money from it, and use the rest to get a nice dual band, cross band repeat, mobile rig that can be used as a base station, where I can hit an area repeater a bit more easily. Where I live (H.U.D. subsidized housing for the elderly and disabled), they don't allow outside antennas...which in a way, is just as well...lightning dances around here during thunderstorms.

410. Operating Frequencies

Yahoo group: CQ100_QsoNet
Date: 2008-07-26 01:49:34 UTC
From: Daryl Stout
Topic: 410 Message: 410

I'm aware of the various digital and voice portions of the bands, and have learned how to use QSO_TV and the MixW program with CQ100.

But, I'm curious as to "preferred frequencies" for the various modes...such as PSK31. I know that the net meets on 14.070 on Saturday mornings, U.S. Eastern Time, but was curious as to other frequencies for it...or if I just use the digital portion of whatever band I want, as long as something else isn't there already (I've noted some CW beacon stations).

Having learned how to use QSO_TV and PSK31 with CQ100 has expanded my resources on it...especially when "I have to be quiet in my Amtrak Sleeping Car". I am looking forward to a lot of Amtrak Mobile operations with CQ100.

On another note, I added some CQ100 Nets to a page I already had up for Echolink Nets (www.wx1der.com/elk.htm)...the ones I know are the Broken Arrow Net, the XYL/YL Ladies Net, the Awful Awful Ugly Net#2, and the PSK31 Net. I saw some others listed in a .PDF file in the files area, but was curious as to whether or not these are still active.

411. Amtrak Mobile Good News and Bad News

Yahoo group: CQ100_QsoNet
Date: 2008-07-31 13:39:49 UTC
From: Daryl Stout
Topic: 411 Message: 411

Well, I made it onto Train 21, Amtrak's Texas Eagle...even though he left Little Rock 3 hours late, but I was able to connect to the internet and CQ100 via my aircard from the Sleeping Car. That is the good news.

The bad news is that there is a bad electric socket in my Sleeping Car Compartment, so the laptop is forced to run on battery...which is only about an hour. If that wasn't enough, as we approach Texarkana at this typing, we're going through a heavy thunderstorm with intense lightning and heavy rain. While the train may be fairly well grounded, I don't want to take a chance.

To make a long story short, I'll have to suspend the Amtrak Mobile portion of the trip to Austin, Texas...and instead try to operate at the hotel, and on the return trip. Sorry for any inconvenience.

I will post another message when I get to Austin...I will try to run the Broken Arrow Net at 0000 UTC Saturday on 3.670 on CQ100 from the hotel...and I will try to operate on the way back to Little Rock on Sunday, August 3.

I'm currently on 3.821 on CQ100, Amtrak Mobile, on the northbound Texas Eagle, from Austin, Texas...heading back to Little Rock, Arkansas.

As per a previous post, I was in Austin for the 2008 ARRL Texas State Convention. Unfortunately, I could not operate on the trip from Little Rock, due to the AC adapter in the Sleeping Car not working. However, it is working on the return trip...so except for a meal break at 1700 UTC and 2200 UTC...I will operate until 0200 UTC...the latter due to "quiet time" on the train. Also, aircard internet conditions from the Sleeping Car may affect operation.

All QSLs will be handled from eqsl.cc -- and other Amtrak trips are planned over the next year...watch here for updates.

421. More Amtrak Mobile Connection Problems

Yahoo group: CQ100_QsoNet
Date: 2008-08-04 00:38:46 UTC
From: Daryl Stout
Topic: 421 Message: 421

First, this problem is NOT related to CQ100.

When they talk about "The Piney Woods Of East Texas", they mean it!! Unfortunately, an abundance of trees on both sides of the tracks has negatively affected the range of the aircard, and thus, my internet connection.

I will try to do a bit more operating this evening, but if this continues, this may be a trip segment where I can't operate. Sorry for any inconvenience.

423. Amtrak Mobile EQSLs sent

Yahoo group: CQ100_QsoNet
Date: 2008-08-04 19:31:19 UTC
From: Daryl Stout
Topic: 423 Message: 423

I made the following contacts with my Amtrak Mobile operation, and have sent an EQSL card to them:

K0ATM, W1PI, W0HHE, K8LEN, W0RCH, VK2ZNS, and WA4TNG.

Unfortunately, as per previous posts, problems with the AC adapter in the Sleeping Car on the way to Austin kept me from operating. The return trip had several instances where I was "in the boonies", and an internet connection couldn't be located for an aircard...the same held true in "the piney woods of east Texas", where numerous trackside trees affected things. And, last but not least, thunderstorms were encountered on both trip segments.

I have other Amtrak train trips planned from Oct. 6-15, 2008...Oct. 21-30, 2008...and April 16-23, 2009...with possible additional trips to the 2009 Austin Summerfest next August, and to the 2009 ARRL Great Lakes Division Convention. However, I won't be able to book these until at least 11 months in advance of departure. Thanks to those who I worked from the train.

That is the correct time, but I heard nothing either.

Apparently, Allen, KD8BMI and his XYL, Linda, KD8GDW, had computer or internet issues, or they might have had thunderstorms in their area at net time, or some other issue.

Allen has also been doing other projects, and is sometimes late when he has to run the Awful Awful Ugly Net#2 on 3.855 during the week, at the same time. For the record, Wayne, KB5AAU, does the net on Monday and Friday, yours truly does it on Tuesday, and Allen does it on Wednesday and Thursday. The Saturday night version has been turned into a "roundtable discussion", then it's the XYL/YL Ladies Net on Sunday.

Also, an unsettled, stormy weather pattern is forecast here through Tuesday...then again by Friday through Sunday. Since no amount of surge protection or lightning arrestors will protect you from a direct or nearby hit, I unplug EVERYTHING when thunderstorms are in the area...and am obviously offline during those times.

I can't help you with your specific question but I must agree with POB's comment --

Logitech boom headsets ($15-$20) work extremely well. I have two different models and they are great!

The best answer I think is that there are a lot of alternatives for you in between your stated $4 Wal-Mart option and the Heil branded solutions. You have many choices.

I use an Altec Lansing headset and mic that everyone says sounds great. I got it at Staples for $15.99. I would think that buying a Heil would be overkill. You need to get a set up that will work well with your sound card. I went through a couple befor I found this one, and it was the first one I bought that was geared just toward the computer.

One thing you might want to check is that if your sound card has a 10 or 20 DB Boost for the mike. Check the volume controls and if there is an advanced button at the bottom of the Mike column, click on that and make sure the BOOST is selected. That helps with some of the cheaper Wal-mart mikes so you don't have to swallow them to be heard.

Using high end microphones like the Heil is simply unnecessary on QSONET. Great audio is possible using inexpensive microphones designed for computers.

I use the Plantronics Audio 310 single muff headset with fully adjustable boom mike. I bought mine at Circuit City for $15. The Audio 310 has great transmit and receive audio, is comfortable to wear and has a long cord.

Another tip is to monitor your own audio when operating on QSONet. By monitoring your own audio you can tell when things are working or not.

Using the Mic Boost in the Recording Control panel is very useful also.

The Moderators of this list might want to review the following and copy it into a textfile that can be downloaded from this Yahoogroup for future reference.

Here are detailed step-by-step instructions on how to setup your headset to transmit good quality audio on QSONET and monitor yourself as well:

1. Run QSONET.
2. Click on Question Mark in upper left corner of CQ100 transceiver
3. Click on Audio Input "Open Mixer" button. (The lower of the two.) This opens the Recording Control Panel which controls the audio sources you FEED to the CQ100 transceiver.
4. Click on Advanced Button under Microphone slider.

(If you don't see microphone slider, click on Options menu and choose Properties. The options for the Recording Control panel will be listed below. Scroll down (if needed) to Microphone and put a check mark in the box next to Microphone.)

5. In the Advanced Controls window for Microphone, put a checkmark in "1 Mic Boost" that appears in the "Other Controls" section of this window at bottom left. Click Close.
6. Make sure there is a checkmark in the Select box under the Microphone slider.
7. Adjust microphone slider for a setting in the lower third or perhaps midway of the slider scale as a starting point. Leave the Recording Control panel open so you can go back to it quickly to make adjustments to the mike once you begin making test transmissions on QSONET.

Monitor your transmit audio this way:

8. Leaving all existing windows open, click on (or Alt-Tab to the) Transceiver Options window and click on the other "Open Mixer" button for the Audio Output.
9. This opens the Volume Control panel.
10. Put a checkmark in the Mute boxes for the CD Player, Line In and PC Speaker. If you don't see these, don't worry. If you don't see the Microphone slider, use the same basic process described above to make the Microphone slider visible.
11. Set the Microphone slider to the tick mark about 3 up from the bottom. You don't need very much of this level.
12. Make sure there is NO checkmark in the Mute box for Microphone.
13. At this point, you should be able to hear yourself in the earpiece of your headset (and probably out of your speakers if you are feeding speaker audio to both which I do. You can use various switches cheaply available to do this or a Y adapter on the speaker output of your computer to feed the speakers AND the headset....your choice.) Set the VOLUME CONTROL panel's Microphone slider so you can hear yourself well but not too loudly.

Now set your levels....

14. Leave the Recording Control and Volume Control panels open so you can click on them as needed to activate them. If you have a large enough screen you can have both of these and the transceiver situated on the screen so each is clearly visible and easy to activate by clicking on them.

15. The Transceiver Options window can be closed though I suggest you take a moment to set the Transmit timer to something like 3 or 4 minutes to reduce the amount of monologues you make. This is the subject of an entirely different thread!!!

16. Activate the CQ100 transceiver window by clicking on the word CORMAC at the top. Put the transceiver on any frequency in the voice band that isn't a calling or net frequency and isn't busy. I like to use 14.349.

17. Put your headset on and adjust the boom so the mike element is either above your nostrils or below your chin (to keep breath noise and popping from being a nuisance.)

The key to success on QSONET is to have adequate transmit audio level without crowding the mike and keeping the mike sensitivity low enough that you don't hear all the background noises in the shack. This is achieved differently by each operator. Generally speaking, keeping the mike element out of the airstream of your nose and mouth is a good start. Most decent computer mikes can be very sensitive especially with the Mic Boost enabled. Band some foam or cloth over the mike element with a twist tie or rubber band to create a simple pop filter. These work VERY well. You will want to set your transmit

level so your audio averages between 9 and 10 on the CQ100 meter with only occasional peaks to 20. More audio than that tends to sound awful. You will set your Monitor audio level so you hear yourself comfortably and well enough to detect when you are popping, breathing or picking up too much background noise. So adjust your headset for a comfy position and either protect the mike element with a pop filter or swing it out of the airstream of your nose and mouth.

17. Click the Mode control so PTT/PTL appears.

18. Press the SPACEBARD on your keyboard or click PUSH TO TALK to key the transmitter (assuming the frequency is not in use, of course.)

19. While speaking in a normal voice count to 4 and emphasize the word FOOOUUUURRRR. Watch the meter on the CQ100. If you are not averaging between 9 and 10 on the meter, activate the RECORDING CONTROL panel and adjust the Microphone slider as needed to get your audio to average between 9 and 10 with occasional peaks to 20. For most mikes this will place the slider between ticks 3 and 4.

20. While still speaking, counting to four and emphasizing the word Four, activate the VOLUME CONTROL panel and adjust the Microphone Slider for a comfortable monitor level.

21. Unkey the CQ100 transceiver with the spacebar or click on PUSH to Talk again. Congrats!!!! You are done and ready to WOW the QSONET community with your outstanding audio!!!

Hope this helps.

Thank you for the article on Headset Mics for use with computer programs.
I use with many other programs that use soundcard generated audio (Echolink
and many other VOIP programs) and have had reports of outstanding audio
with all of them. Thank you KB4T for the outstanding Article. I think it
will help
many if used as discribed.

438. CQ100 and Hurricane Ike

Yahoo group: CQ100_QsoNet
Date: 2008-09-12 20:20:05 UTC
From: Daryl Stout
Topic: 438 Message: 438

If I'm not mistaken, the CQ100 servers are located in Houston, which may take a direct hit from Hurricane Ike. Widespread power outages are forecast across the Gulf Coast inland from the storm...and landfall is still 10 hours away at this typing.

The bottom line is, if the servers are in Houston, and depending on their "power protection" and location, CQ100 might be down for a bit in the coming days. Hopefully, it won't get that bad...but storm surge is already inundating the Texas coastline ahead of Ike, a very large hurricane...and that surge extends eastward into Alabama.

Details on Ike are at the National Hurricane Center website at:

http://www.nhc.noaa/gov/#IKE

Daryl, N5VLZ

440. Amtrak Mobile In October

Yahoo group: CQ100_QsoNet
Date: 2008-09-26 16:02:29 UTC
From: Daryl Stout
Topic: 440 Message: 440

Once again in October, I will be operating CQ100 Amtrak Mobile during 2 train trips that I will be taking.

The first one will be to Denver, Colorado the first part of the month...and to Apopka, Florida (near Orlando in late October). The Denver trip is a belated birthday present to my Mom, to join her at this years National Underwater Marine Association Convention. The Florida trip is to visit my in-laws, and my late wifes grave one last time.

I will be operating on 3.821 on CQ100 from the Sleeping Car compartment, on my laptop computer, and with my aircard. This is a "novelty operation", and all EQSLs will be done via eqsl.cc - a sample EQSL card is under my entry on the QRZ website. The 3.821 frequency was chosen, as at one time, Little Rock, Arkansas was known as "Net 3821" in the FIDONet Computer Bulletin Board System (BBS) Network.

If the train is running late, these times will obviously change (there may be additions, changes, delays, or deletions). Also, there may be areas where I can't get an internet connection with the aircard, so that will also affect operations. The approximate start and end times (UTC) on the respective dates, are as follows:

Tuesday, Oct. 7 - 1300 UTC to 1630 UTC, and 1800 UTC to 1900 UTC.
Wednesday, Oct. 8 - 1930 UTC to 1630 UTC, and 1800 UTC to 0200 UTC.

** In Denver, Colorado, Oct. 9 through 12 **

Monday, Oct. 13 - 1300 UTC to 1630 UTC, and 1800 UTC to 2030 UTC.
Tuesday, Oct. 14 - 1900 UTC to 2200 UTC, and 2330 UTC to 0200 UTC.

Wednesday, Oct. 22 - 1300 UTC to 1630 UTC, and 1800 UTC to 1900 UTC.
Thursday, Oct. 23 - 0030 UTC to 0200 UTC and 1300 UTC to 1630 UTC.
Friday, Oct. 24 - 1300 UTC to 1630 UTC.

** In Apopka, Florida, Oct. 24-26 **

Monday, Oct. 27 - 1915 UTC to 2200 UTC and 2330 UTC to 0200 UTC.
Tuesday, Oct. 28 - 2330 UTC to 0200 UTC
Wednesday, Oct. 29 - 1900 UTC to 2200 UTC, and 2330 UTC to 0200 UTC.

I may try to operate from the special Sleeping Car Passenger Lounges at Chicago, Illinois...and Washington, DC...but that's not guaranteed.

An additional trip to ARRL Headquarters in Newington, Connecticut, is planned for April 16-23, 2009. I will post operating dates and

times in early April, 2009.

I will send out an EQSL from the laptop at my respective destinations to those who make contact.

73,

Daryl Stout, N5VLZ

442. CQ100 Amtrak Mobile

Yahoo group: CQ100_QsoNet
Date: 2008-10-07 13:25:39 UTC
From: Daryl Stout
Topic: 442 Message: 442

Note: The original message posted before I was finished,
so I am reposting it. DS

Once again, yours truly, N5VLZ, is Amtrak Mobile, and with
CQ100. I'm on a trip with my Mom to Denver, Colorado, for
the National Underwater Marine Association Convention this
week.

I will operate CQ100 Amtrak Mobile as long as I can get an
internet connection with the aircard...taking a brief break
for lunch around 1700 UTC, then operating from maybe 1800
to 1900 UTC, having to go QRT with arrival in Chicago.

My Mom and I boarded in in Little Rock last evening, amidst
thunderstorms...and at this typing, the train is in St. Louis.
We have to spend the night in Chicago, due to schedules, before
continuing to Denver tomorrow afternoon. I will post an updated
message sometime tomorrow.

I am on 3.821, choosing that frequency, because at one time,
the Little Rock metro area was Net 3821 in the FIDONet BBS
Network. A sample EQSL card can be found at my listing on the
QRZ website. This is a "novelty operation", so no award, per se, can
be obtained.

Daryl Stout, N5VLZ

443. Connection Issues with Amtrak Mobile CQ100

Yahoo group: CQ100_QsoNet
Date: 2008-10-07 13:50:53 UTC
From: Daryl Stout
Topic: 443 Message: 443

I don't recall if I mentioned it in the last post, but weather conditions and internet conditions will obviously affect my CQ100 Amtrak Mobile operations. If thunderstorms are noted, or if I get into an area with sporadic coverage, I'll be QRT for a bit...but will be back as soon as possible.

Daryl, N5VLZ
CQ100 Amtrak Mobile

444. Trip Trouble

Yahoo group: CQ100_QsoNet
Date: 2008-10-08 21:31:35 UTC
From: Daryl Stout
Topic: 444 Message: 444

For whatever reason, I have been having a great deal of difficulty getting and keeping an aircard internet connection from the train...so my CQ100 Amtrak Mobile operations are much less than I would like...but, there's not much I can do about it. All I can say is to check on 3.821, and if you don't hear me after about a minute, chances are I can't get a connection. In that case, just try again later.

Also, while I seemingly had a good aircard signal from the hotel in Chicago last night, I apparently couldn't do much with it. At this typing, I'm on the California Zephyr, heading toward Denver...but the signal has been poor to erratic at best.

I do have another Amtrak trip later this month, going to Florida to visit my late wife's grave...so hopefully, conditions will be better then.

Frank - this link requires registering with Grouply to see your list of Groups. Please avoid similar posts in the future.

Members:

I also caution our members about Grouply. There is much discussion amongst experienced YAHOO Group Owners about the potential for exploitation and misuse of Grouply members' YAHOO IDs and email information.

So, my advice to our members is to do some research about Grouply and similar services before blindly entering your name and email information!!!!!

Thanks,

Joe, N2QOJ - Moderator

447. Grouply

Yahoo group: CQ100_QsoNet
Date: 2008-10-18 04:53:03 UTC
From: jasinnj2000
Topic: 447 Message: 447

Well, I got another invitation to join Grouply from another member of this Group. It appears
that it comes from the individual's email address but Grouply is really sending it.

That means that our email addresses are now known to this service because a member of the Group has given them full access to this Group and any other Group that the member belongs to.

Beware: Joining Grouply means divulging your YAHOO password.

Here the kicker: Blocking Grouply from sending you more invitations requires you to give them your email address! That means that you have voluntarily given Grouply your email address. Who knows what they do with it then.

Ignoring the invitations is absolutely the best strategy!

I can't understand why anyone would give out their YAHOO ID and password voluntarily. For ease of Group management?

Know what you are doing with your personal credentials!!!!!!

449. Another CQ100 Amtrak Mobile Try

Yahoo group: CQ100_QsoNet
Date: 2008-10-19 04:20:38 UTC
From: Daryl Stout
Topic: 449 Message: 449

Well, after the poor aircard/internet conditions on this last Amtrak trip...from both the train and the hotels...I had debated about whether or not to try it again. But, I'm going to give it a shot on a trip to visit my late XYL's grave one last time from Oct. 22-29. Actual travel time on the train will be on Oct. 22-24, and Oct. 27-29.

The CQ100 Amtrak Mobile operation times are subject to change, due to:

a) the trains schedule (if the train is put into the siding for freight trains...Amtrak operates on freight lines outside of the northeast U.S.)

b) aircard and internet conditions (which were very poor this past trip)

c) weather (thunderstorms) outside the train

d) reservation seatings in the Dining Car, and how long it takes to get served, etc. Amtrak is experiencing record ridership by the day, and so they have to have several seatings for each meal.

e) layovers at Chicago and Washington, to change trains

I will be on 3.821, but if you don't hear me on there for a bit, just try again later. As a result, I'm not going to post the exact times here. However, I know that I will NOT be able to operate from 0200 to 1300 UTC daily, as that's "quiet time" on the train.

I will try to operate the Broken Arrow Ragchew Net from my in-laws home in Apopka, Florida, on 3.670 at 2300 UTC on Oct. 24, Oct. 25, and check into the Not To Worry Net at 2330 UTC on Oct. 26. But, this will all depend on the "schedule" they have while I'm there...and I plan to meet a couple of hams in the area, that I've met on CQ100.

Any questions can be directed to me at my email address on the QRZ website. After this trip, my next train trip won't be until next April, when I make a once in a lifetime trip to ARRL Headquarters. A Guest Rewards circle trip may be made next summer, but I won't know about that until at least next May.

Daryl, N5VLZ

I just got going on CQ100 and pluged a stereo headset with a long cord into the computer headset jack and it works great. For a mike I found an old mobile dynamic mike and put a stereo plug on the end and it sounds great I'm told. I put a long cord on it. I used a stereo plug into the mike input jack. I wired one wire to the tip and the other to the small ring. Nothing to the ground terminal. I don't see a need to buy a standard computer headset. Some day I guess I'll buy a proper computer headset so I don't have to hold the mike.

If the poor aircard reception wasn't bad enough, the tracks are so bumpy that it's hard to get any rest on the train. The bumpiness isn't Amtrak's fault, as they have to use tracks of the freight railroads outside of the northeast corridor.

Suffice it to say, I've basically had to unfortunately abandon the idea of Amtrak Mobile via CQ100. However, a local ham radio club is planning a late fall "Field Day type event", where I will be demonstrating CQ100. I'll post more on this as it gets closer, but it has become too much trouble to try to operate CQ100 Amtrak Mobile from the Sleeping Car. Sorry for any inconvenience.

From: Joe Cusimano VE3OV
Topic: 468 Message: 468

Thanks to those who responded to my question in my previous posting, especially Barrie, VE1CSY for his offer to help. My computer is a Windows XP with an on board sound card.

The problem has now been solved and the MIC GAIN knob is indeed varying the Mic Gain through the CQ100 as it is supposed to.

Previous to installing my CQ100, the only microphone device I had used was my webcam. When I installed my CQ100 and headset microphone, I clicked on the question mark at the upper left corner which brought up the audio input selector where I selected the sound card as the audio source into the CQ100. That made the transceiver's meter kick up properly and proper Mic audio to be sent out.

However as I subsequently discovered the Mic Gain knob had no effect on controlling the level of audio going out. Selecting the audio source as I indicated above, apparently is not selecting the audio source that the knob controls.

On my XP computer, to select that source, you must go to the computer's control menu and click on Settings and then select Control Panel. From the Control Panel menu, select Sounds and Audio Devices. Click on Voice and select the Sound Card as the audio source.. That makes the knob work the microphone gain slider as it is supposed to.

In short, you must have the sound card selected at both control panel locations. Lesson learned.

Daryl -

Thanks for the query. You Said:

Is this net on CQ100 itself??

The net is "simulcast" i.e. broadcast on CQ100; you cannot break-in on 7.268; however, I standby live up 10 on 7.278 from 0715 - 0830 to assist persons off the yachts and away from their ham gear keep in touch with their fellow cruisers by relaying msgs by real radio.

Stop by, you will find it interesting as from Tampa I can not copy the stations on the east coast of FL so I have a partner, AB4T outside Raleigh, NC that picks up the simulcast for those boats I cannot hear.

And in case you are wondering; it is all approved by Doug, VE3EFC, CQ100 manager; to include the Special Call QK1LCH used on 7.268.

Enjoy Terry K1LCH

OK, I want to make sure I have it right...they can LISTEN ONLY on 7.268, but can get with you on 7.278 from 7:15pm to 8:15pm Eastern Time, to pass traffic, etc., correct??

>Stop by, you will find it interesting as from Tampa I can not copy the
>stations on the east coast of FL so I have a partner, AB4T outside

I'm real busy with Echolink and CQ100 Nets through the week...so, it might be a "stretch" for me to check in.

>And in case you are wondering; it is all approved by Doug, VE3EFC, CQ100
>manager; to include the Special Call QK1LCH used on 7.268.

Sounds interesting. I'm originally from Hialeah, Florida, but live in Little Rock now. I recognize the Q prefix from the CW Beacon stations, as callsigns set up by Doug.

475. PSK-31 on CQ100

Yahoo group: CQ100_QsoNet
Date: 2009-02-03 23:49:00 UTC
From: Kim
Topic: 475 Message: 475

I've been running PSK-31 on CQ100. It's pretty easy to set up in case anyone is interested. Open the software you want to use. Then go to Control Panel, Sounds, Volume, Advanced, Options, Properties, Recording, then click Stereo Mixer, then turn the down slider almost to the bottom. On the CQ100 Radio set Mic Gain to minimum and AF Gain to about 9:30, and mode to VOX. When you transmit CQ the S meter should read about S10. Works perfect except not many responses probably because most ops don't know how to set it up yet. Now you do!

Thanks for the refresher on it. I hadn't used it in awhile, so this will help me get it going again.

There used to be a PSK31 net on CQ100 on Saturday mornings, but it was cancelled awhile back, due to lack of checkins. However, after my schedule settles a bit, I'm looking at possibly starting it up again. I still have to decide on a time, but will probably do the same setup as before...where they started on 14.070 for checkins via your favorite digital program, then we moved to 14.105 for a roundtable.

Unfortunately, I have several health issues to deal with right now...and have been helping with a Technician License class and VE Testing in the central Arkansas area...as well as involved with Echolink and/or CQ100 Nets on a nightly basis...either as Net Control, or as a checkin. But, I would like to get things going again...however, it may be sometime in March before this occurs.

Contact Tim, KB3KPH...he was the one who originally had a website for that...and he might still have the information. Or, it could be something simple that you may be forgetting to do with the setup. Then, when you find the error, you feel so dumb...been there, done that!!

If your needing help setting up your soundcard, software and CQ-100 for the digital modes, please try going to www.kb3nph.com. In the KB3NPH Ham Shack menu on the left of the main page are two page links to help. There is a video actually showing you how to set your soundcard, software, and CQ100 to be able to use the digital modes.

480. Nets And Their Starting Times

Yahoo group: CQ100_QsoNet
Date: 2009-02-14 03:25:55 UTC
From: Daryl Stout
Topic: 480 Message: 480

Ever since I first became an amateur radio licensee in 1991, running nets has been an integral part of my participation in the hobby. I feel this holds true whether the net is on RF, Echolink, CQ100, or elsewhere.

To me, when one accepts the responsibility as a Net Control Station, to run a net at a certain time...that Net Control Station should be there at the appointed net time. If they can't start the net on time, I feel they should at least announce something to the effect that "the net will be a few minutes late starting"...or they should make an effort to get a substitute Net Control that evening. If neither of these is possible, it's always good for another station to go ahead and pick the net up.

Some have felt that "it's unfair to not wait for the Net Control"... but I say that "it's not fair to the stations wanting to check into the net to keep them waiting". While some nets get a large number of checkins, others get very few. Either way, I feel that it's unfair to keep them waiting.

I understand that last minute emergencies can come up...whether personal illness, thunderstorms in the area, issues with the computer or internet, etc. But, on several of the nets I've been on lately...whether running them, or checking into them...there have been several "short time" checkins. And, it's not fair to keep these stations waiting, either.

I also have seen it where nets in progress were interrupted, or cancelled by either a priority or an emergency traffic situation (Skywarn severe weather operations, etc.) that developed during the net...and that of course stopped the net, until the situation was resolved...or the net was cancelled altogether.

I know that there are other things in life besides amateur radio...and that one can't make every net. But, since the Net Control Station is volunteering their time for the net...and others are taking time out of their schedules to checkin to these nets...I feel that the nets should start on time, if at all possible...no matter whether it's a ragchew net, a digital net, a roundtable, etc.

As a side note, I maintain a list of CQ100 and Echolink Nets (which meet on a daily and nightly basis) at www.wx1der.com/elk.htm -- the nets are listed in UTC Time and U.S. Eastern Time.

>Greetings Robert!
Some years ago I built a audio interface that would allow me to
establish a link between the out put of a rig(tranciver) and the
input of a two meter transciver(basicly a transformer)you could use
a tapped transformer,thus allowing you generated voltage to control
a relay for push to talk,and allow interfacing on a second tapp
for your audio interface, in my case I only need one setup because
most HF radios all ready have a VOX internally, Since I was the
control
operator I also have a second remote transciver that allowed me to
turn
the audio link on and off(I used a uhf radio for that), But with a
little expermentation you could build one of your own or might find
a VOX board that you could refit to operate also!
Good luck.....73's

484. Hammin' In The Park/CQ100 Demo March 29, 2009

Yahoo group: CQ100_QsoNet
Date: 2009-03-25 03:51:33 UTC
From: Daryl Stout
Topic: 484 Message: 484

A central Arkansas ham radio group...the Cabot Area Simplex Group...is going to do a mini-Field Day type event this Sunday, March 29, 2009...in which I plan to demonstrate CQ100 and QSO-TV.

The group will be set up at Willow Beach State Park, near Scott, Arkansas...about 5 miles east of North Little Rock...and adjacent to the Arkansas River. While the weather looks to be stormy here Wednesday night into Saturday morning, it also looks to be sunny, but cool, for the Hammin' In The Park. I'm not sure how many of these events the group has done...but it's a great way to demonstrate amateur radio.

If I can get the aircard on my laptop to cooperate, I'm looking to be on 3.670, the same frequency used by the family of the "Broken Arrow Nets"...which normally meet nightly at 6pm Central, 7pm Eastern Time. Those checking into those nets at least 15 times, get a special certificate in PDF format, or printed and mailed to them (the latter option for the U.S. and Canada stations).

The event will start around 12 Noon Central, 1pm Eastern Time...and, we will operate about 4 to 5 hours before shutting down. Besides the CQ100 and the QSO-TV that I'll be doing, we'll also have an HF station setup. However, I'm not sure what bands we'll be on...but, they will likely be in the General class portion of the bands. I will try to post a follow-up message here, on the morning of the event.

I am also considering designing a special certificate for the Hammin' In The Park event, and will make a final decision on that in the coming days. However, with stormy weather forecast here Wednesday night into Saturday, I may get very little computer work done before then...and will have to "work around the weather".

Daryl, N5VLZ

485. Reviving Of CQ100 PSK31 Net On April 19, 2009

Yahoo group: CQ100_QsoNet
Date: 2009-03-27 18:35:52 UTC
From: Daryl Stout
Topic: 485 Message: 485

In recent days, several have asked me on various CQ100 Nets that I run about PSK31 on CQ100. With that in mind, I am planning to revive the PSK31 Net on CQ100 soon.

The net itself will start out on 14.070, with checkins via your favorite digital program such as MixW, Digipan, etc. After the digital checkins are taken, we will move to 14.105 for a roundtable discussion.

While the net used to meet at 9am Eastern Time on Saturdays; due to personal scheduling issues, the net will begin on Sunday, April 19, 2009 (the Sunday after Easter), at 4pm Eastern Time. I am involved with VE Testing in central Arkansas on Saturday, so Sunday afternoon is the best time for me.

I will be the primary Net Control Station, with Tim, KB3NPH, helping out when I am not available. I do have 2 "conflicts" in 2009...the first on Sunday, May 3, for the OzarkCon QRP Weekend in Branson, Missouri...and the second on Sunday, Sept. 20, 2009, for a trip with my Mom to the Clive Cussler Collectors Society and National Underwater Marine Association (NUMA) Convention in San Diego, California, via Amtrak.

For those needing help in configuring their digital application with CQ100, Tim, KB3NPH, has prepared a video on setup, located at:

http://www.kb3nph.com/HamRadioAndVOIP/CQ100AudioSetup.html

If you have any questions, please email me at n5vlz@... -- and I hope to see you on the PSK31 Net, starting Sunday, April 19, at 4pm Eastern Time. I will also add this net to the Echolink and CQ100 Nets page that I maintain at:

http://www.wx1der.com/elk.htm

73,

Daryl, N5VLZ

486. CQ100 At Hammin' In The Park On March 29, 2009

Yahoo group: CQ100_QsoNet
Date: 2009-03-28 21:14:35 UTC
From: Daryl Stout
Topic: 486 Message: 486

I am still planning and hoping to operate/demonstrate CQ100 from a local mini-Field Day type setup several local hams will do from approximately 1700 to 2000 UTC Sunday, March 29, called Hammin' In The Park.

However, there is one "fly in the ointment"...whether or not my laptop aircard can get an internet connection. We will be near the community of Scott, Arkansas (east of Little Rock), and I know that they have internet service there...but, it remains to be seen whether I'll be able to get on the internet or not.

If I am able to do so, I will be on 3.670...the same frequency as the Broken Arrow Ragchew Nets...which meet nightly at 6pm Central, 7pm Eastern Time...UTC Time is 2300 UTC from the second Sunday in March to the first Sunday in November, and 0000 UTC the rest of the year.

I have also designed a certificate for the Hammin' In The Park event, which I will post to the group sometime later this evening. Unlike the certificate for the Broken Arrow Ragchew Net, you only need to make one contact with me on CQ100 to get this certificate.

Please note that I would PREFER to email the certificate to you in Adobe Acrobat Reader PDF format, as I can get it to you within a day or two after the Hammin' In The Park Event. If you are in the U.S. or Canada, you have the option of getting it printed, and sent via First Class Mail...however, it may take up to 2 weeks or longer for you to receive your certificate this way. If you are outside of the U.S. or Canada, it MUST come via email in PDF format, as I could NOT afford the postage otherwise.

Please email me at n5vlz@... if you have any questions.

>connect via a phone number to whom ever
>was or is your srvice provider(ISP), like AT&T, Bellsouth, etc...

It's with AT&T. I used the setup when I was on recent train trips, and was Amtrak Mobile from the Sleeping Car.

>How come you didn't do a dry run earlyer in the week, to find out if it
>would work?

We had a threat of severe weather much of this past week, and I wasn't able to get out as a result. Besides, if there is thunderstorm activity in the area, I shut everything down, to protect from lightning damage. I've seen and heard too many horror stories...and have not only been indirectly struck twice...but have been under 2 tornadic funnel clouds, and within a mile of a rain wrapped tornado.

489. Sample Hammin' In The Park Certificate

Yahoo group: CQ100_QsoNet
Date: 2009-03-29 01:05:08 UTC
From: Daryl Stout
Topic: 489 Message: 489

I have uploaded the file SMPLHMPK.PDF -- a revised sample Hammin' In The Park Certificate. For stations making contact with us that day, they'll be eligible for the certificate. You will need the Adobe Acrobat Reader to view the file. The reason I changed it, was because I found better graphics to use for it. The Hammin' In The Park is a mini-Field Day event, put on every few months by amateur radio operators in central Arkansas.

Once I obtain the logs from the Hammin' In The Park Event, I will prepare certificates for those making contact with us...and it can be used at any future Hammin' In The Park Event. I have PURPOSELY placed SAMPLE in the sample document, so only those who make contact will receive a certificate.

I would PREFER to send the certificate via email in PDF format (as noted, the Adobe Acrobat Reader is required to view the file)...and I can send it within 24 hours of the event. Stations in the U.S. and Canada have the option of either getting it in PDF format, or printed and sent via the Postal Service. However, with the PDF format, you can have your copy within 24 hours after I prepare it...but if printed and sent via the Postal Service, it may take up to 2 weeks or more for it to arrive. Stations outside the U.S. and Canada MUST have theirs sent via PDF format, as I could not afford the postage.

While there will be a regular HF station there, I'll be demonstrating CQ100 and QSO-TV...but the only "fly in the ointment" will be whether or not my aircard can get a connection. However, I do know they have Internet service in Scott, and I believe cell towers there as well. I'm not sure how far away we'll be from there, but as long as I can get an aircard connection, look for me on 3.670 on CQ100, starting around 12 Noon Central Time (1700 UTC), March 29. I'll operate as long as my UPS and laptop battery will let me...which I think will be at least 3 hours, if not more.

492. Certificate Delivery For Hammin' In The Park Contacts

Yahoo group: CQ100_QsoNet
Date: 2009-03-31 20:14:49 UTC
From: Daryl Stout
Topic: 492 Message: 492

At the Hammin' In The Park mini Field Day event this past Sunday, I made 17 contacts on CQ100. Two additional contacts came up on the screen, but it was hard to see their callsign due to being out in the sun...and they didn't come back when I gave their callsign...so, they are not in this list.

I am now in the process of preparing a PERSONALIZED certificate for each of the following contacts:

KG7OM, WA1REQ, K0ATM, W3LB, WB2JQJ, KB6SDI, KC4VL, KA3TOR, KK7SR, K8LEN, K3FXR, KC8TMU, WB0WLS, VK3FTAB, WA1LMD, KE5UZU, and VK4FPOD.

For the stations within the U.S. or Canada, you can get your certificate one of two ways:

1) PDF format emailed to you. The Adobe Acrobat Reader is required to view the file. You should get it within a day or two after I send it.

2) Postal Mail. I will print and mail it...however, it may take anywhere from 3 days to 3 weeks to get it.

Of the contacts made, 4 of them (as checked on QRZ) did NOT have an email address...so, these 4 (all inside the U.S.) will be Postal mailed to them. However, for the other U.S. contacts, I will email your certificate to you, in PDF format, UNLESS you email me at n5vlz@..., and tell me you would prefer postal mail instead.

Two of the contacts were from Austrailia, so these will be emailed to them in PDF format.

If you have any questions, please email me at n5vlz@... -- and I will respond as quickly as possible. We are in a rather stormy weather pattern here now, and with thunderstorms every 2 days, it has limited my computer and email work.

73, and thanks.

Daryl, N5VLZ

493. Email Correction For Hammin In The Park Certificate

Yahoo group: CQ100_QsoNet
Date: 2009-03-31 21:03:25 UTC
From: Daryl Stout
Topic: 493 Message: 493

A CORRECTION to the email in the message for the Hammin' In The Park Certificate.

Rather than delete and repost the previous message, the email for me (which is an alias to my main email) is n5vlz@... -- why the Yahoo message editor would NOT let me post it is beyond me. I do have intensive spam filters on the address...and I HATE the message editor here in the Yahoo Groups.

I am also sending out an individual email (blind carbon copied) to those stations I made contacts with, to ask for their response...on whether they want their certificate in PDF format, or printed and Postal Mailed.

The PDF format requires the Adobe Acrobat Reader to view...and can get to the recipient within 2 days after I send it. This option is available worldwide. For contacts in the U.S. and Canada, their certificate can be printed and postal mailed, but it may take up to 3 weeks to arrive. Stations outside the U.S. and Canada MUST have their certificates emailed in PDF format, as I could NOT afford the postage otherwise.

Sorry for any inconvenience.

Daryl Stout, N5VLZ

495. Hammin' In The Park Certificate Update

Yahoo group: CQ100_QsoNet
Date: 2009-04-03 03:29:52 UTC
From: Daryl Stout
Topic: 495 Message: 495

Of the 17 stations that I made contact with on CQ100 with the recent Hammin' In The Park demonstration...only 6 of the contacts have let me known which way they want their Hammin' In The Park sent to them...either email via PDF, or Postal Mail.

If an email was not found for them on the QRZ website, if they requested postal mail, or if I did not get an email response from them (based on their email on QRZ), I will prepare their certificates, and send them off early next week...possibly Monday.

For those contacts outside the U.S. or Canada...or for those who have requested PDF format, I will prepare and email your certificate to you early next week...again possibly Monday. You will need the Adobe Acrobat Reader to view the PDF file.

The reason for the delay is threefold:

1) I have to get additional mailing envelopes for the certificates.
2) I will be at a hamfest in western Arkansas on Saturday.
3) Thunderstorms are likely once again early next week (as they were much of this past week), which eliminates any computer work.

Because of this, it may take from 3 days to 3 weeks to get your certificate, if it is coming via postal mail. However, those getting theirs via Adobe Acrobat PDF format, it should take about 2 days after I email it, for you to receive it.

If you are in the U.S. or Canada, and made a contact with the Hammin' In The Park station this past Sunday (I have the log with me), and want PDF format instead of Postal Mail, please email me at n5vlz@... by Monday, April 6. If I do not hear from you by then, your certificate will come via Postal Mail.

498. Hammin' In The Park Certificates Processed

Yahoo group: CQ100_QsoNet
Date: 2009-04-06 14:54:24 UTC
From: Daryl Stout
Topic: 498 Message: 498

After an unexpected long delay, I have FINALLY processed the 17 contacts made with the March 29, 2009 Hammin' In The Park mini Field Day, and CQ100 demonstration.

The following stations have been emailed their certificates, in PDF format...requiring the Adobe Acrobat Reader to view...based on their email addresses listed in QRZ:

KG7OM, WA1REQ, K0ATM, W3LB, KB6SDI, KC4VL, KK7SR, K8LEN, K3FXR, WB0WLS, VK3FTAB, WA1LMD, and VK4FPOD.

The following stations did not have an email address listed on QRZ...so their certificates were printed, and are to be mailed today from the area Post Office:

KE5UZU, KA3TOR, KC8TMU, and WB2JQJ

I rechecked the names, callsigns, and contacts from the log for the certificates, and all of them should have gone to the right address...whether email or postal mail. Please contact me at either my email or postal address on QRZ, when you get your certificates...or if I somehow made an error.

I can also be reached on the Broken Arrow Ragchew Net on CQ100 on 3.670 on Tuesdays and Thursdays at 6pm Central, 7pm Eastern, or 2300 UTC...as I run the net those nights. Other net controls run the net other nights of the week. Once you get 15 checkins on that net, you get a nice certificate as well. Stations in the U.S. and Canada have the option of getting theirs in PDF format via email, or printed and sent via Postal Mail. Stations outside the U.S. and Canada must have theirs emailed in PDF format, as I could not afford the postage otherwise.

Please allow at least 2 days for receipt of the certificates via email...and at least 2 weeks for receipt of the certificates via Postal Mail.

73, and thanks for the contact with Hammin' In The Park!!

502. Storms and April 19 PSK31 Net

Yahoo group: CQ100_QsoNet
Date: 2009-04-16 16:04:32 UTC
From: Daryl Stout
Topic: 502 Message: 502

Thunderstorms may affect the "revived" PSK31 Net on CQ100 this Sunday, April 19. Arkansas is in the eastern part of "Tornado Alley", and April and May are our prime months for thunderstorms and severe weather.

I had planned to start it April 19, at 4pm Eastern Time, on 14.070 with digital mode checkins, using Digipan, MixW, etc. -- then moving to 14.105 for a roundtable discussion.

However, thunderstorms are forecast to move into my area (central Arkansas) Friday afternoon, and last into Sunday evening. When there are thunderstorms in the area, I can't use the regular high speed internet and computer setup, with the threat of lightning damage. And, the aircard connections become more erratic than usual during that time...especially with running on a laptop on battery.

I will post a message about an hour before the net on Sunday (around 3pm Eastern Time) in this group...on whether or not the net will take place. If the net has to be postponed, we'll try it again next Sunday, April 26.

I apologize for any inconvenience...but, where I'm living...the best protection from lightning is to unplug everything. When this place was originally built over 30 years ago as a prototype, they apparently did NOT install grounding rods. I do not know if that has been rectified of late or not.

We took a lightning hit out here 18 months ago...and apartments in both my building, and adjacent buildings, were affected. I can't tell you how many electronic items (TVs, VCRs, DVDs, computers, routers, modems, etc.) were taken to the dumpster as a result of the lightning hit.

Daryl, N5VLZ

503. Won't Make PSK31 Net Today

505. Storms And The April 26 PSK31 Net

Yahoo group: CQ100_QsoNet
Date: 2009-04-22 20:27:43 UTC
From: Daryl Stout
Topic: 505 Message: 505

No, this is not a repost of the last message...but, unfortunately, there is a risk of thunderstorms again being in the central Arkansas area on Sunday, April 26...just as there was last Sunday, April 19... when a Severe Thunderstorm Watch was in effect for central and eastern Arkansas.

While I could possibly try running the net with my aircard on the laptop, it seems that whenever thunderstorms are in my area, the aircard "poops out" every 6 minutes...and I obviously can't run a net like that.

I always unplug as much electrical equipment as I can whenever thunderstorms threaten, to protect from lightning damage. Arkansas is in the eastern part of Tornado Alley...and April and May are usually our stormiest months of the year.

I will make a final decision around 2pm Central Time Sunday, if not before. I am wanting to get the PSK31 Net on CQ100 going again, but it is not worth the risk of possibly having everything I have destroyed in a lightning strike.

My apologies for any inconvenience...your understanding is greatly appreciated.

506. Soundcard Setup For Digital Modes And CQ100

Yahoo group: CQ100_QsoNet
Date: 2009-04-23 16:39:28 UTC
From: Daryl Stout
Topic: 506 Message: 506

Tim, KB3NPH, has set up a tutorial video off of his website on how to configure ones soundcard for using the digital modes and CQ100. The video is at:

http://www.kb3nph.com/HamRadioAndVOIP/CQ100AudioSetup.html

Once the page loads, click on the play (right arrow) button on the bottom of the display, and watch the video. While he uses MultiPSK for his program, I use MixW, and I believe Digipan will work just as well.

This would be better than for me to try to explain it in a message.

Daryl, N5VLZ

507. CQ100 PSK31 Net Today at 4pm Eastern Time (2000 UTC)

Yahoo group: CQ100_QsoNet
Date: 2009-04-26 18:12:21 UTC
From: Daryl Stout
Topic: 507 Message: 507

It looks like the weather will cooperate this week, and so I am going to do a PSK31 Net on CQ100 this afternoon (Sunday, April 26), starting at 4pm Eastern Time, 3pm Central Time (2000 UTC). I will try to hold the net each week at that time...but, if weather or something else is an issue, I'll try to post a message a few hours prior to the net... and we'll just try it again the following week. It isn't worth it to risk a lightning strike destroying all your equipment.

We will first meet on 14.070 on CQ100, for checkins via your favorite digital program, such as DigiPan, MixW, MultiPSK, Ham Radio Deluxe, etc. After we get several checkins, we'll move over to 14.105 for a digital roundtable.

The amount of checkins will determine how long the net will last. I'll probably do 3 rounds on PSK31, and 3 rounds on phone...the latter being a 73 round on each. After the 73 round on PSK31, we'll give folks a few minutes to QSY. After the 73 round on the roundtable, we'll close the net. So, if you're late checking into the net, we can still try to squeeze you in, as it were.

To set up your soundcard with CQ100, you can either look at the video that Tim, KB3NPH, has on his website (the URL was posted in previous messages), or use this "quick and dirty guide"...I know Tim will correct me if I messed this up!! (hi hi).

1) Right click on the speaker icon in your taskbar. Choose "Open Volume Controls".

2) Click on "Options", then click on "Properties".

3) Click on "Recording". Stereo Mix (or something similar) and Mic should be checked. I've found that Stereo Mix works best. Don't worry about anything under "Playback", or anything else under "Recording" at this time.

4) Open CQ100, and logon to the system.

5) Click on the ? (question mark) in the upper left. The information for Audio Output and Sound Input should be your main computer sound card. If you have more than one sound card, change it to your preferred one.

6) Click on "Open Mixer" with the "Audio Input" box. It should show the Mic and Stereo Mix referred to in Step 3 above.

7) If using digital mode (for PSK31), make sure that Stereo Mix is checked. If using voice mode (for the roundtable), make sure that

Mic is checked.

8) Lower the slider to near the bottom for the Stereo Mix...you can raise the slider for the Mic, as you'll need it when using voice instead of digital.

9) On CQ100, your AF control will control your audio output. Set it to 11:00, although you can adjust it, if needed. Set the mode on CQ100 to VOX for PSK31 (switch back to PTT when going to phone). Set your VOX level at 7, and dwell to the max (I think 1.8). The high dwell time ensures that if you are a slow typist, your signal won't quit when you're done.

10) Open your digital program (DigiPan, MixW, MultiPSK, Ham Radio Deluxe, etc.), and choose Configure. Set the sound card input and output to what is your main computer soundcard.

11) Click the TX (transmit) button in your program, and adjust the AF control until the audio on CQ100 is around 9...tweak it if desired. Adjust the sound slider (volume levels) to when you start transmitting in your digital program, it'll key the VOX in CQ100. Likewise, when you stop transmitting, it will unkey the VOX.

Lastly, if you go to Tim's website to look at the video, while the video quality isn't all that good, you can still get an idea of what is going on. Also, he asks that if you go to his website, to please sign his Guestbook. That way, legitimate ham radio requests won't have their IP addresses blocked.

Thanks to Tim, KB3NPH, for his assistance in this.

Daryl, N5VLZ, Net Control
CQ100 PSK31 Net

508. April 26 2009 PSK31 Net Log

Yahoo group: CQ100_QsoNet
Date: 2009-04-26 21:29:09 UTC
From: Daryl Stout
Topic: 508 Message: 508

The following stations checked into the CQ100 PSK31 Digital Net and Roundtable for April 26, 2009:

1) N5VLZ, Daryl, Little Rock, AR (Net Control)
2) W2WXP, Marty, Stuart, FL
3) KB3NPH, Tim, Spring Run, PA
4) N7SD, Ernie, Lakeland, FL
5) VE6GAR, Garry, Brooks, Alberta, Canada
6) KB2MOS, Doug, North Syracuse, NY
7) K0RRL, Dwain, Oshkosh, NE
8) W3GEG, Al, Morgantown, WV
9) G7WEY, David, England, UK
10) K4EET, Dave, Severn, MD
11) SM5CS, Stig, Vasteras, Sweden
12) 9Y4MYA, Ali, Trinidad (late checkin)

This is a learning experience for everyone...including Net Control; so your patience is appreciated. I learned that unless you LOCK the frequency at 1000 Hz, it will tend to waver...I finally found the LOCK control with MixW (blush!).

One change to an earlier post...when thunderstorms are in my area at net time, I will notify Tim, KB3NPH, and he will take the net for me in my abscence...considering Pennsylvania tends to get fewer stormy weather days than Arkansas does.

The net will meet every Sunday, at 4pm Eastern Time, 3pm Central Time, 2000 UTC. When the United States goes back to Standard Time, the UTC Time will be 2100 UTC. And, for those U.S. Stations that do NOT observe Daylight Savings Time, your net time will be ONE HOUR EARLIER, when DST is in effect.

The net will start with PSK31 Digital Checkins on 14.070 FIRST... using your favorite digital program such as DigiPan, MixW, MultiPSK, etc. After the digital checkins are obtained, we will move to 14.105 for a phone roundtable discussion on digital modes, etc.

I want to thank Tim, KB3NPH, for all his assistance and encouragement in restarting the PSK31 Net on CQ100, and look forward to being Net Control

Joe...

>Looks like you had a very good turn out for the Net....
>
We sure did...and I learned something...amazing you can teach an old Net Control new tricks (hi hi). I also discovered another feature of MixW after the net, so I should have no problems next week, with the frequency drifting on me. You know what they say...real hams read the documentation...or at least, skim through them (hi hi). And, as noted...Tim, KB3NPH, said he would do the net if stormy weather kept me offline.

Also, I need to again let folks know that you need to check in via PSK31 during the first part of the net...if you don't have the software setup on your system...just be patient, and we'll get to you when we go to the phone roundtable portion of the net...since that usually lasts longer anyway. Since I have a pretty good idea of what I'm doing now (!!), it'll make it easier for others to work with. And, lastly, I think the net time will be better for all concerned.

Al...

>14.105 for phone??????????????????????

Correct. The net STARTS on 14.070 with PSK31 digital checkins ONLY...using your favorite digital program such as MultiPSK, DigiPan, MixW, etc. No voice checkins will be accepted on 14.070, as that's the digital portion of the band.

I just checked the CQ100 display, and 14.099 and below is the "CW Band"..14.100 and above is the "Voice Band" for 20 meters. This is DIFFERENT than the "HF Band Chart", where the voice portion does not begin until 14.150 -- but this net is on CQ100...NOT regular HF.

After everyone has checked in via digital mode, we MOVE to 14.105 for a roundtable discussion, and any other comments...as it takes less time that way. Those wanting to set up PSK31 and CQ100 would likely not want to have to wait for an extended round of digital checkins. When we go to the "voice roundtable" any questions concerning setup can be asked at that time.

As a side note, I *THINK* I've gotten the glitches fixed that I ran into last week. I found the setting for the tone, as well as the LOCK feature in MixW. So, if I do make the net Sunday (we have a risk of severe weather and flash flooding in Arkansas into next week), stations won't have to follow me all over the band!!
If I can't make it Sunday, Tim, KB3NPH, will be Net Control.

Daryl Stout, N5VLZ

Folks,

If the email address that you have registered with to this Group is bouncing or not functioning, the associated member will be removed.

Please check that your email address is working, especially those of you who check this Group on-line and don't rely on the email distribution.

It's important that the Group owner/moderators can communicate with a member via email in case of some issue of concern arises. If we don't have a valid - WORKING - email address for you, then the member will be removed.

There were about 18 members in this situation today. 4 were removed because the bouncing analysis showed "de-activated" or "email user not known".

Thanks for your attention to this matter.

Regards,

N2QOJ

Sometimes the email servers are troublesome, and I sent my email to you via a private email. I may be delayed in responding sometimes, because of the threats of severe weather and flooding we have here into next week. In fact, I'm trying to finish my computer work and get errands done before more storms arrive later today.

Say Daryl,

Another way to get the last minute info to the group users is thru the beacon. Any information you want passed, please just send it to me. I will place it in the beacon and start transmitting it on CQ-100 frequency 14.075. I will run it for about an hour off and on at different hours during Friday evening and on Saturday before the net begins. Let me know if this works for you.

Tim (KB3NPH)

That'd work just fine...and if you want to modify what I sent for a possible preamble, feel free. I wanted a general guide for how the net is to operate. I think that some were confused that they could check in via voice on the digital portion of the net...and I think I mentioned that in the preamble that I sent you.

At the moment, I can't think of anything else offhand. I wish the weather pattern was more cooperative, so I could finish all the computer and PSK31 stuff I need to do. I haven't had a chance to look more into setting up Skype yet...I've had other computer issues to deal with, and I'm preparing to teach a Technician License Class at my church in a few weeks. At least I found the deal with the tone frequency (1000 Hz) and the LOCK switch with MixW...so folks shouldn't have to chase me all over the band!!

And, it still looks like that the weekend here will be a stormy washout, as it were. You know we'll be wanting the cool rain when it hits 100 in August!!

I had thought of that myself, or CQ100 "contests". I know there are several CQ100 Nets during the week...and while I've talked to people in several states, I know I'm nowhere to doing a "CQ100 WAS", as it were. I personally would like to see that...although if I remember right, they tried a contest recently, but cancelled it due to "lack of interest". It might also have been "a bad time, schedule wise" to have the contest...but for that matter, it's hard to find a "good time for a net"...VoIP or otherwise!!

520. CQ100 PSK31 Net Log For May 3, 2009

Yahoo group: CQ100_QsoNet
Date: 2009-05-03 21:17:55 UTC
From: Daryl Stout
Topic: 520 Message: 520

The following stations checked into the CQ100 PSK31 Net for Sunday, May 3, 2009:

1) N5VLZ, Daryl Little Rock, AR (Net Control)
2) KC0EQA, Doug Hastings, NE
3) KE0N, Eliot Minneapolis, MN
4) KB3NPH, Tim Spring Run, PA
5) VE6GAR, Garry Brooks, Alberta, Canada
6) KB3FN, Lynnn Cumberland, MD
7) W2WXP, Marty Stuart, FL
8) SM5CS, Stig Vasteras, Sweden
9) WA1PJG, Mike Manchester, NH

Tim, KB3NPH wanted me to remind everyone about the CQ100 PSK31 links on his website, www.kb3nph.com -- just look for the links on the left side of the page.

A reminder that the net meets every Sunday, at 2000 UTC, 4pm U.S. Eastern Time, starting on 14.070 with digital checkins via your favorite PSK31 program...such as MixW, DigiPan, Ham Radio Deluxe, MultiPSK, FLDigi, etc. After we get digital checkins, we move to 14.105 for a voice roundtable. The net usually lasts around an hour or so. This is a learning experience for all, so please join us, and share your comments.

73,

Daryl, N5VLZ
Net Control

522. CQ-100 PSK/Digital Users Net

Yahoo group: CQ100_QsoNet
Date: 2009-05-14 17:42:54 UTC
From: Tim Browning
Topic: 522 Message: 522

As some know, we have re-started the CQ-100 PSK/Digital Users Net on Sunday, 4:00pm Eastern Time (2000 UTC). The net starts with a PSK check-in on 14.070. Following the check-ins there will be one round of comments in the PSK mode then we will QSY to 14.105 for a voice roundtable. This will allow those who are having problems with software, set-ups, or any other questions or comments about the digital modes or CQ-100 to let us know and maybe get help.

Also, for some reason Daryl (N5VLZ) who was instrumental in getting me involved back with CQ-100 and the net has dropped out of sight. For some reason he has given up on ham radio and CQ-100 completely, according to an e-mail he sent me.

I would like to know if anyone would be interested in helping share the NCS responsibilities for the PSK/Digital net. If your interested, please contact me thru this reflector or by sending me a message at KB3NPH@....

Also I would like to let everyone know that I have users net webpages available on my website. www.kb3nph.com. There are instructions for setting up CQ-100 for the digital modes using Vista and XP. There are interesting videos about setting up and using PSK on HF, and a lot of other interesting information. When and if you log in, for the first time, or if you haven't already done so, please sign the Guestbook. This helps me see how many are supporting the webpages and helps develope it further thru your comments and suggestions.

Hope to see you on the website and on the net.

Important Announcement.....

On June 11th, 2009 Yahoo! Groups will be down for maintenance.

The outage is scheduled to begin between 2 and 3 pm PDT (10-11 pm GMT) and last for up to an hour.

526. Learn how to use this Group's online features

Yahoo group: CQ100_QsoNet
Date: 2009-06-19 19:27:42 UTC
From: Joe Sammartino
Topic: 526 Message: 526

For those members who would like to learn about the online experience of this YAHOO Group, please visit this link:

http://help.yahoo.com/l/us/yahoo/groups/original/members/

You will find great information on the features - and how to use them - of your Group membership.

This information will help you to view and download files, photos, links or other information that has been posted to the Group.

You will also learn how to manage your membership configurations such as message distribution choices, changing your email address registration, etc.

There is so much more available than simple email distribution.

If you have any specific questions about any of these features, you can always send an email to this Groups owner.

Regards,

Group Owner / Moderator

Hello Tom,

when I was using the CQ100 I was using the sound card audio input.
I soldered two line cable to the speaker of my keyer with the speaker built in and soldered a mono small jack at the other end.
You can also use a transceiver side tone through the head phones jack as on the sketch...

please see the file attached....

From: Frank N. Haas
Topic: 530 Message: 532

To achieve the most pleasing results you need something that produces a sine wave output. Regrettably most keyers don't provide a very pleasing tone. I enjoy operating CW on QSONET but the experience is far less than pleasant when the tone used by the other station is not sinusoidal.

The DAHDIDAH program offered by CORMAC (the folks that bring you QSONET) is an excellent tool for sending Morse using a straight key, bug or an electronic keyer paddle. You can download DAHDIDAH from the same place you downloaded CQ100. The manual is simple and short. The cable required is easy to build and will work on most (but not all) computers via a USB to Serial adapter.

Dahdidah runs on all desktop computers I've tried. I've had issues with notebook PCs and Netbook PCs because the sound electronics in these critters tend to be compromised versions of the full blown sound electronics in most full size desktop systems. I don't run VISTA so I can't speak for that OS. Dahdidah is by far the easiest and most effective solution for producing very pleasing CW on QSONET using just about any type of keying device. DahDiDah would be my first choice.

If DahDiDah does not work properly or you are allergic to making the cable or using a USB to serial adapter (if one is needed) or you prefer to spend a lot of money and time, you can invest in a code practice oscillator (CPO) that produces sine wave output. The speaker audio or headphone audio of the CPO can be routed to the Mic In of your computer very effectively through a 1 MFD capacitor wired in series with the "hot" lead or you can use a small audio transformer.

The CPO can then be keyed by a straight key, bug or electronic keyer and paddle. You can monitor your sending the same way you monitor your transmit audio when using voice. (Search for KB4T in the messages here or look in the Files section for an article I wrote on how to monitor your transmit audio.)

Keep in mind that CW, digital modes and voice are all sent the same way on QSONET. It's just audio. You aren't turning a carrier on and off or doing anything very special. Instead of your voice, you are sending audio tones. That is what DahDiDah does except that it does it using sinusoidal audio.

My desktop computer runs DahDiDah nicely and I can use any form of keying I want when I'm at home using that program. I can connect a straight key, bug or keyer paddle and send code nicely. When I'm on the road, it's a little more complicated.

My newest Netbook does not run DahDiDah properly which breaks my heart and makes things a bit more complicated. When I travel I carry a second case with my "QSONET CW KIT."

In the kit is an MFJ 554 Classroom CPO that produces sine wave output. The CPO is connected to the netbook using a simple coupling cable that runs from the external speaker output of the CPO to the Mic In on the small PC. Then I choose either the Vibroplex Straight Key, Vibroplex Original Bug or a K1EL electronic keyer and Vibroplex keyer paddle with which I will send.

The kit could be somewhat smaller and lighter if I didn't have to carry the CPO and the electronic keyer but DahDiDah won't work on the netbook. I'm willing to carry all that stuff because I really enjoy being able to send code on QSONET using those tools and sending with sine wave output.

If you spend any time listening to the wide variety of CW "signals" on QSONET you will quickly begin to appreciate the real value of true sine wave output. DahDiDah is free so that's the best first choice. The alternative is expensive. The MFJ 554 is $90 and any decent keyer is going to cost $50 to $150.

You will hear all kinds of sending tools employed on QSONET so feel free to send with whatever tool you want and at whatever speed you like. There are plenty of folks out there who will work you from 10 to 40 WPM. Hope this helps!

Topic: 542 Message: 543

I am a member of both 'teams'.
I find Hamsphere has the old time quick and dirty QSO and so far I have not found any nets. There is also background noise just like in HF.
The one big difference among CQ100 users and Hamsphers users is that non-hams are allowed on Hamsphere - gives these people a chance to talk around the world and gain operator experience for getting a ham ticket.

The qso's on CQ100 last for several minutes up to an hour or more, even among first time contacts.

CQ100 has several nets throughout the day, evening, and weekends.

There is one net I am a member of called Show and Tell 400. The 400 because we meet on 28.400 Tuesday, Thursday, and Saturdays. There are several certificates available for working the members - certificates are based on SAT member numbers.

KA0AK and W6ALC are the net gurus and there are several net control stations that rotate the duty.

This net meets at 10:00pm EST on Tuesdays and Saturdays and at 9:00pm on Thursdays.

There is also the Hoot Owl net that meets on 7.242 at 9:30pm EST M-F.

There are many many more nets but these are two I have the time to get on.

Date: 2010-02-06 20:34:27 UTC
From: Jerry Colton
Topic: 542 Message: 544

Hello Joe and Group
I subscribe to CQ100 as well as Hamsphere. I like both very much. I am the Forum Admin for Hamsphere as well.
Hamsphere does allow non licensed folks who are radio enthusiasts to operate. This has some good points and bad ones. What I find most rewarding using Hamsphere is seeing folks actually use this program as a tool to learn proper operating skills. In the last month and a half, I know of 4 guys that went on to get their ticket. Hamsphere wasn't responsible for that happening but all said it helped them greatly in learning about ham radio and operating.
We do get a flurry of "pirates" but have been very fortunate to have tracked them down and suspend their accounts.
I am most impressed at the way that a large percentage of the non licensed folks conduct themselves. These folks are what are known as 11 meter DXers. Some with years of experience outside of the amateur community.
There have been several nets but they haven't caught on yet but I suppose they will as soon as the Hamsphere population grows. We did have 1 contest so far and it was a huge success.

It is a constant battle to keep the trouble makers off the bands but we are very succesful at that as well. Most are just on their free trial period so they are gone, for the most part, after 3 days.
All in all, it is a terrific program with the real HF feel.

I certainly don't look at CQ100 and Hamsphere as competitors but as 2 similar VOIP programs promoting Ham radio.... the best hobby in the world!

73
Jerry - N1TKO

Amen!!!! I Totally Agree with Hamsphere being a bunch of crooks. they they tried to become a system like CQ100 and not even Close. HAMSPHERE wants like 7 dollars us to try out there system. i sent my friend there to register and my friend couldn't even register to try out the system unless he pay ed 7 dollars for a week to try out HAMSPHERE.

HAMSPHERE get out of here that's not Ham radio... CQ100 Rocks KEEP up the Good WORK CQ100..

I had a link up till the other day on my web site till the other day but needed the room so ill be putting the link back up soon as I can.

Conrad, Jerry -

Thanks for that feedback. Very interesting stuff. I began my trial last evening - not much activity. I did hear a couple of QSOs and some "tone" music on one of the bands.

It's certainly good to have some choices in the area of RF simulated VoIP.

Benybarr -

Wow, I was looking for some comparison of the service not the Forum experience.

You have me very curious. I wonder what you had written to cause such backlash as you describe. I did check the Forum but found nothing there from you. I guess they eradicated your musings.

I thank you all for your input and I'll post some of my own observations over the next few days.

Regards,

Joe, N2QOJ

Well guys, CQ and Hamsphere are both cool but when the REAL hambands are open, these are 2nd fiddle. If I were going to support either program it would be hamsphere because Hamsphere has such a cool radio-like sound. :-) But like real ham radio, there is room in virtual ham radio for both programs. :-) God bless all.

I don't have a lot of choice living in a high rise with restrictive covenants. No, Hamsphere and CQ 100 are not radio, but they are part of ham culture. Elderly in nursing homes can use the programs. So they are helpful but not for everyone. The BC band is there for testing your mic level before you tx on the bands. I don't have a problem with it.

From: w2blc
Topic: 559 Message: 559

Has anyone found a PTT mic that will work with CQ100?

I built a prototype based on the PCB from an old keyboard. It works, but the button I chose is too stiff. However, the idea does work.

Thoughts?

560. Re: [CQ100_QsoNet] PTT mic

I used a very simple method of using an existing ptt switch to activate the microphone live wire and then put CQ100 into VOX mode.
By doing this, the mic is only live when the ptt is pressed, hence the vox on cq100 only cuts in when you press the button. Worked well for me...a simple solution. There is probably a much better one out there.

562. Is the problem my ISP, or is there a server problem?

Yahoo group: CQ100_QsoNet
Date: 2010-06-24 20:55:04 UTC
From: w2blc
Topic: 562 Message: 562

Not often, but enough to be distracting, I experience a drop of incoming signals. If I click the band button for the band in use, the problem will usually correct itself. Rarely, I will have to restart CQ100.

Also, rarely, the message about connecting to QSO Net will be seen on the information display and everything will stop.

This is all more of a problem within the past couple of weeks than it has been in nearly two years of daily use.

I tend to blame Time Warner - as most of the contacts I have are using them and say they are having similar problems.

So, is anyone not using Time Warner experiencing similar problems?

563. Re: Is the problem my ISP, or is there a server problem?

Sorry to hear about the problems you are experiencing.

I can't speak to the Time Warner question since I have COX Communications as my ISP.

I hope someone on this Group can give you some feedback soon.

Regards,

Joe, N2QOJ

I have essentially the same problem with intermittent connection to CQ100
and I use AT&T as my ISP.
Right now AT&T is having a problem is several areas with connectivety - finally
someone at the AT&T trouble desk said this. THe heat must be affecting
the repeaters or whatever they are called for the aircard connects just like
the heat does for ham repeaters. Still not a lot of fun when signals drop or
no connection can be made.

Why call for a vote on whether CQ100 should continue or not?
If you enjoy it, use it, if only to listen. If you don't enjoy it, forget it. The proprietor of the program should have the final say as to whether his creation should continue. Opinion of an 83 yr old seldom active ham.

Don -

I don't know where you got the idea of a vote to continue CQ100 or not.
That's ridiculous.

I wanted to know if it was worthwhile to take a poll on an activity related
question or two.

I agree, if you use it and have fun, that's great. I'm just trying to get a
feel for how often folks are using CQ100.

Greetings All!
While we are on the subject of CQ100 radio, can anyone tell me how much bandwidth is used for a project like
this, and what the monthly cost run a operation like this ?
Thanks
Nicholas

If you are on any type of broadband service - DSL, Cable - then I would not be concerned about bandwidth.
*
QsoNet uses very small internet bandwidth: Approximately 1.8 KB/s = 14.4 kbaud.*

Cost?
*
Licensed stations may try the system free for 90 days.**
The QsoNet server subscription costs $32 (usd) per year, starting at the end of the free trial.

*All of this information and more can be found at the product web site:

http://www.qsonet.com

I agree. CQ100 is not radio, but it is part of ham culture. Let everyone do what they want. Don't use CQ100 if you don't like it.

Ham radio is all about communication. Now, just what do you do on ham radio? Communicate!!!

About 1/4 of my hamming is on CQ100 - where I get to talk with friends no longer able to get on "real" radio.

Not everyone operates CW, or RTTY, or AM, or SSB, etc. I look at CQ100 as just another mode.

I only operate on 160, 75, and 40 meters - where there is less participation that there was a few years ago. Could be conditions, age of the hams, of just too many choices in life.

I am glad CQ100 is available. But, like the other modes - if you don't like it, then don't use it. Don't bad mouth it just because you don't use it.

Bill W2BLC

Enough is enough!!!!!

No one is bad mouthing CQ100.

No suggested a poll to stop CQ100.

No one suggested getting rid of CQ100.

It would be great if folks could actually read the message posts instead of "skimming" or browsing.

I was just curious how everyone is getting on with CQ100 much - do you use it much, sometimes, not lately, etc.....

Obviously, everyone here on this Group has, or has used CQ100, and is not a basher.

So enough everyone, please move on.

581. CG3MUG Special Event Station Announcement 100th Birthday/Anniversary

Yahoo group: CQ100_QsoNet
Date: 2010-11-25 16:33:40 UTC
From: cg3mug
Topic: 581 Message: 581

ALL STATIONS ALL STATIONS ALL STATIONS

This weekend ONLY on CQ100. Special event station VBA Thunder Bay Canadian coast guard radio CG3MUG will be "guarding" CQ100 frequency 14.260 MHz. Times are from 1300UTC until 2300UTC on Saturday and Sunday, 27/28 November 2010. We are celeberating 100 years of continous radio (and other modes) of servoce on the Great Lakes.

Full details are available at www.QRZ.com (CG3MUG). We are using the old Marconi Spark Gap Morse "wireless" callsign "MUG". The fact that the "CG" in our special event callsign stands for Coast Guard was serendipity.

Since we are a working CG station, please be patient if your call isn't answered immdiately. If our DSL link is down, I will post alternate times for Monday and Tuesday.

73,
Robert, VA3ROM

PS: A comment about "real" radio. As both a Professional and Amateur Radio operator (actually I'm a Communications Officer) my job is "tele" communications and not just limited to "radio" communications. We don't care how anyone sends the "MAYDAY/SOS" and/or how it gets to us! As a Ham, had I restricted myself to only using "real" radio, which is Morse code (as everyone knows--HI! HI!), I would missed out on "communicating" with many fine people, from around the world. "The medium is the message."--Not the other way around. (Understanding Media: The Extensions of Man,(c)1964, Marshall McLuhan).

McLuhan is channeling The Bard: "What's in a name? That which we call a rose, by any other name, would smell as sweet!"

582. Fwd: YAHOO Groups Maintenance

Yahoo group: CQ100_QsoNet

From: Doug
Topic: 583 Message: 583

Helloooo out there friends,
I finally subscribed after several years of thinking about it. Better late than never is my motto! Seems like there was a lot more activity in years past. I'm not complaining mind you-just curious where those 30,000 plus subscribers are hiding. I do like the general vibe of the users I do hear. Will be looking forward to a few QSO's but listening is really my bag. Thanks for reading.
73,

(another) Doug W6KE

584. Life continues on CQ100

Yahoo group: CQ100_QsoNet

From: w2blc
Topic: 584 Message: 584

I have been on CQ100 for several years - on a daily basis. I use RF and VOIP both - they each have their applications. But, I enjoy CQ100 very much, as there is no QRM, QSB, QRN, and operating manners are excellent.

Being able to share pictures is just the frosting on the cake.

I hope you users are getting the word out - as there are many folks that don't know about CQ100.

Ham radio is about communication and companionship - CQ100 fills that bill nicely. It is perfect for all the hams that can no longer have a regular station with outside antennas - for whatever reason.

There are many nets active on CQ100 - as can been seen from this list:
http://www.w2blc.net/cq100nets.htm

Enjoy - I sure am,

Bill W2BLC

hi Bill,
Nice to see your note and I totally agree with you. I am in Taiwan without the use of a radio and it was great to find CQ100.
I initially got on looking for CW and the past week I have been keeping an eye on 14.058 (CW calling freq), using CwGet and keeping track of the number of CW operators. Just after one week there were 30+ different operators from 10 different countries.
I am really glad to see this much interest and use of CW on CQ100. I was on hamsphere for a while, and rarely if ever heard CW.
Not sure how best to get the word out...hitting the message boards is one way, of course!

Looking forward to seeing you on the bands!

Randy, KF4O

I'm in Taiwan, and have been having intermittent problems like you describe...but it only last for a minute or so.
What country are you in?
Other items to check....your speakers, headphones (hit the ? at the top left of the radio)
Also, do you have skype on your computer? Maybe turn it off and see if this affects you.
Am guessing you are on windows? Am also assuming your web browser is having no problem connecting?

Folks,

Please read this notice from YAHOO:

Dear User,

Unfortunately, the time has come to say goodbye to Yahoo! Groups Labs Applications (beta) and Groups Chat. We thank all the users that were a part of this program. We intend to use this learning to enhance Yahoo! Groups further with new features.

On July 04, 2012, we will shut down the Yahoo! Groups Labs Applications (beta) and Groups Chat. We request you to backup any data that you might have
created using the applications.

This closure will not affect your other services on Yahoo! Groups.
We look forward to continue having you as our customer.

Best,
The Yahoo! Groups Team

617. PSK31 or RTTY operating - looking for QSOs

Yahoo group: CQ100_QsoNet
Date: 2012-10-23 22:27:43 UTC
From: g0amo
Topic: 617 Message: 617

Anyone out there like to give PSK31 or RTTY a go on CQ100.

As a keen datamodes operator looking for some skeds on 14.070

I use HRDs Digimaster 780 via the Mixer to feed CQ100. Works well.

Also works well on CW mode too.

Hope to see you on the datamodes part of the band.

618. Yahoo Groups Maintenance

Yahoo group: CQ100_QsoNet
Date: 2013-01-15 04:03:15 UTC
From: Joe Sammartino
Topic: 618 Message: 618

Folks,

Yahoo has announced some downtime coming up for YAHOO Groups:

"We're upgrading our systems and Yahoo! Groups will be unavailable for a few hours on the night of January 15th Pacific Standard Time. Emails sent to your groups will be delivered late during this time. For the latest information on this planned maintenance, check our product blog: http://www.ygroupsblog.com/"

Please make note of this event.

Thanks,

Joe, Group Owner/Moderator

619. Proper adjustment of VOX mode

Yahoo group: CQ100_QsoNet
Date: 2013-02-19 23:45:45 UTC
From: Alice N
Topic: 619 Message: 619

I have been a very contented user of CQ100 since 2008. Recently,I got it into my head to try VOX instead of pressing the space bar to alternate between RX and TX. VOX seemed to work before making an actual QSO. The other station said I was clear, but cutting off syllables. I have set both the level and dwell controls at max.
Help pse. What settings would rectify my problem?
Many tnx,
Ken (K2JLK) in Flushing, NYC

620. VOX adjustment--2nd info request

Ken,

Are you familiar with the basic operation of VOX?

- It is dependent on YOUR microphone characteristics.
- It is dependent on YOUR speaking volume, tone, and style.
- It is dependent on YOUR computer's audio device settings.
- headset will behave much differently than desperate mic and headphones or computer speaker.
- It is necessary for you to experiment until you get a workable mix of all of the above.

Proper adjustment is based on your understanding of the components that make up VOX control.

Regards,

Joe, N2QOJ

623. Re: Proper adjustment of VOX mode

Yahoo group: CQ100_QsoNet
Date: 2013-02-24 14:47:19 UTC
From: kb4t_ham_radio
Topic: 619 Message: 623

Ken:

It is NOT surprising that more help hasn't been forthcoming. Few people use VOX because it doesn't work well.

I've been using VOIP services like QSONet (CQ100), HamSphere, TeamSpeak, Echolink and so on for several years. I use these services from the home shack, mobile, fixed portable and handheld. That is, I use a variety of devices (computers) and microphones depending on the setting. In general, I find VOX to be unusable on all VOIP services.

Loss of the first syllable is a common problem with VOX operation in any environment. Even under ideal studio conditions, VOX can be less than reliable. I do NOT recommend using VOX on any of the VOIP services.

The two controls on the face of the CQ100 transceiver allow you to set the "sensitivity" of the VOX trigger part of the software and the "Dwell" or delay before the transceiver returns to receive mode after keying into transmit.

I have found only ONE (1) scenario where VOX-like performance has been satisfactory. When using high end professional voice processors (Symetrix 528E, Presonus Studio Channel, Aphex voice processors and similar products) it is possible to get VOX-like performance without loss of first syllables in a studio environment. Unfortunately NONE of these boxes will key your VOIP transceiver reliably because of the other variables (mike quality, acoustic environment, computer operating system mike related settings and VOIP software being used.)

As someone else pointed out here, these many variables all have a hand in how VOX will behave. After hours of experimentation, I haven't found ANY combination of settings that will work well with consumer-priced equipment.

Bottom line: It ain't worth it.

The next best thing is to configure the VOIP software to allow "one click" keying and unkeying. Most decent VOIP software allows this capability. Click a button or press a key ONCE to transmit and the transmit function is LOCKED on. Speak as long as you like and then click a button or press a key to receive. No lost syllables and virtually hands-free operation.

If you abstitively posilutely MUST operate VOX, you will have to develop the annoying habit of saying, "AAHHHH" or "Ummmmm" or grunting or snorting or something to key the transmit function and ensure that audio is present nearly all the time to keep the transmit function locked on. Such operation is both fatiguing to the transmitting operator and torturous for the listener.

It would be wonderful if a foot switch could be used with VOIP software. Perhaps one day, an enterprising individual will develop a USB foot switch that will allow hands-free transmit keying for the most popular VOIP software packages (each will have to be

accommodated separately as they all key differently.) Until then, LOCKED PTT is the best answer...in my view.

Good luck.

From: Randy - KF4O
Topic: 631 Message: 631

Have been in contact with Doug and the old forum has seen its last.
He felt that "with less than 1 post a week, we decided to archive the old forum instead of starting again from scratch."

So, it probably does not matter to many folks at this point, but it was a nice place to look for information. The problem is now it is also hard, if not impossible to search.

Too bad... was nice while it lasted.

That is one of the main reasons to have a user support site totally independent of the developer --- the user community retains control.

The other reason this Group would be better to use as the main user support site is, unlike the forum, this Group distributes messages by design, you don't have to visit and search for topics of interest, they all come to you.

Topic: 631 Message: 634

This Group was formed in 2006 and has 268 members.

Since the CQ100 usage is down, I don't know how many non-members would even be interested in joining this Group.

Doug, VE3EFC, was invited to join at the outset of the Group and declined. Since he is no longer running an active forum for his members, maybe he'll decide to join the Group.

As for advertising, I don't think that is the way to go. If folks are interested in joining, they'll find the Group.

Thanks for your interest,

Joe, N2QOJ

That is interesting.....
The "News" page at QSONET.com states the following:
"The Qsonet discussion forum has been closed because it had become a target for hackers. We were able to export the entire forum as a searchable archive containing 4,150 messages. Unfortunately, new posts are no longer possible.
If anyone wants to make an announcement into this news page, send email to douglas at qsonet dot com."
This seems to be a bit different than what Doug mentioned to Randy.
Regards,
Joe, N2QOJ - Group Owner

636. New poll for CQ100_QsoNet

Yahoo group: CQ100_QsoNet
Date: 2013-07-01 17:02:38 UTC
From: CQ100_QsoNet@yahoogroups.com
Topic: 636 Message: 636

Enter your vote today! A new poll has been created for the
CQ100_QsoNet group:

Are you actively using CQ100?

o Yes
o No
o Using Hamsphere Now
o Went back to RF

To vote, please visit the following web page:
http://groups.yahoo.com/group/CQ100_QsoNet/surveys?id=13183868

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

637. Re: QSO.net forum

Date: 2013-07-01 23:40:55 UTC
From: Randy - KF4O
Topic: 631 Message: 637

Actually,
Doug is just explaining why they did not want to start over again. Seems they could have made a forum that would have been somewhat resistant to hackers, but according to Doug, "with less than 1 post a week, we decided to archive the old forum instead of starting again from scratch."
But... it would be nice if he would join the group here and encourage others to do the same.

Dear Joe,
It is with great regret that I must inform you that my Dad Denis Ryan passed away on Sept 10. My mum passed away 12 days before and after this my Dad had no interest in living. I know he was very proud of his call sign and we did include it on the death notices in the Herald and the Irish Times but I am not sure if any one picked up on this.
Please contact me if necessary at healyfam1@....
Yours
Mary.

I thought this was a good computer program while I used it free. I couldn’t justify $35 +/- a year for an internet program that most of the time just had old timers talking about the weather.

I would keep it on as an as-needed basis if it were free.

Topic: 650 Message: 650

Good evening all. Thanks for letting me join. I tried on the yahoo site and because of being legally blind, the confirmation codes were impossible to make out. I just started linking CQ100 to my echolink node on 147.420. The frequency on CQ is 29.420. The connection seems to work well. Do I need to register the gateway with QSONet? I chose 29.420 because the 2m frequency is 147.420. Thanks for the frequency guide and other information you sent when I joined. I look forward to going through it. 73 for now. Mike W1MWB

I was on CQ100 several years ago, but had to let the subscription lapse due to financial and other issues, but I am back online now.

Anyway, one of the things I remember doing with it was PSK31...at the time I think I used MixW, but since my callsign was changed over 3 years ago, I haven't gotten an update for it (since I had registered it). But, I believe I can use DigiPan instead for PSK31.

I don't recall offhand how to integrate DigiPan with CQ100, so if anyone can direct me to the info, I'd appreciate it. Also, if anyone can direct me to information on various nets on CQ100, I would appreciate that as well. I'd be glad to add that to my bio info on QRZ. :)

I am moving into a smaller apartment, so these rigs have to go.

Icom IC pro 756 III : $1,250
Icom IC 7800 : $5,000

Flex 6300 : $1,900
Acom 1000 : $1,500

Elecraft k3/p3: $2,200
Elecraft KX3: $1,050

Yaesu FTDX 5000mp : $3,800
Icom IC 7000: $700

Buyer pays shipping.

Glenn,
I have a website that has a "for sale" bulletin board that I can list you rigs. We're pretty close so there may be some operators in this area that would be interested in you equipment.
http://www.nwahams.com/html/bulletin_board.html
is the site....I can add it to our club website, as well.
http://www.hogvillehams.com/index.html
Let me know if you would like to add your list on the board. If you do than you just let me know what to eliminate as you sell the stuff...
Looks like pretty good value for most of it so there will certainly be some interest.

I monitor CQ100 but don't recall your call on anything that I usually listen to.....

I'm located in S. Madison County on the pigtrail.

This appears to be a scam.

That grouping of equipment has been known to be used as bait many times.

This Group does not allow selling and messages dealing with selling should be ignored.

Thanks,

Group Owner

You're right...just spotted the same ad on several other Yahoo lists
with discrepancies.

Warning!
This is a confirmed scam. Person is not ka2ssx. You can go to QRZ dot com
and enter the call in the upper right of the home page...and it will take
you to the msg thread.

670. Account Closure

Yahoo group: CQ100_QsoNet
Date: 2016-12-16 11:09:34 UTC
From: m5kvk@...
Topic: 670 Message: 670

In view of the continued inability of Yahoo to secure the accounts of it's subscribers, I am resigning from all Yahoo Groups and closing my Yahoo Account with immediate effect. I strongly recommend others to follow suit. I also encourage group owners to find more secure platforms on which to build their communities.

So long, and thanks for all the fish :-)
73

Gareth, M5KVK

Sorry for that, I have to say that in general we live a world now where hacking is a problem no matter where you go. As far as Yahoo did you realize the latest hacking that was disclosed actually occurred in 2013 and it was only just discovered?
It is not like your account information was recently compromised.
The best thing to do is watch all your online information and change your passwords often and make them secure. No company can protect your information, you have to.
My 2 cents,
73, Tom

Tom,

Gareth left the Group four days ago. He won't be reading your message.

Regards,

Joe, Group Owner
